ord, make me an instrument of Thy peace; Where there is hatred, let me sow love; Where there is doubt, faith; Where there is despair, hope; Where there is darkness, light; and where there is sadness, joy.

not so much seek to be consoled, as to console; to be understood, as to understand; to be loved, as to love; for it is in giving that we receive, it is in pardoning that we are pardoned, and it is in dying that we are born to eternal life.

dear Bob: Mother wrote to you last on may 25 (letter of and I wrote to agnes on the same day. We enjoyed your very intresting description of the trip to horefjell and Jotunneimen, your letter dated april 23, that is the last we have heard from you. Glad you had such a nice master holiday, and that the wax-testing trip was successfull. I wrote Erling strom today and told him about himar b. I book and your trip to Jotunheimen. That makes both him and me homesick. I have read your letter over a ain several times, and almost imagine that I have been with you on those trips.

We had a nice evening about a week ago at Jo and Peg's skihut. It was their annual meeting. Mother and I pere both invited and Percy D. drove us up in his car. The only other men invited were Peter, harry P., and Pam k's husband "Dill". Fran was there, she had just graduated with first class honors, and they all asked about about you. We drove the cars right in to the camp, and ma had an awful time getting out again after a very heavy, and very much needed, rainfall. Jo has been chairman of the house committee, and Peg of the competitions. Mother has helped them, and that is the reason why she was invited. There has been very little activity in the R.B.'s this winter, and I hardly ever see any of them. The very early break-up, hot weather and lack of rain, forest fires and no fishing have not helped matters. I do not know how George F. is getting on at his place. have tried to logate him here. I guess he misses you alright. They had a big fire near Jo's and Peg's camp which streched North and Last. It is Peter's birthday today, and I expect Peg in here to pick up our presents for him. They had their holiday last winter, and will therefore not be able to get wway for any length of time. Jo will have a couple of weeks beginning the end of this month, and I think she will take her bicycle on a trip, while mother and I will go out to pick up new material for a new little booklet for which I hope to get an order again this year. In this way we may be able to close the house for a couple of weeks and cut out all expense here. Re. J.R. lacquer, they have about 800 unfilled cans at the paint factory. That will give us a start, and I will order another 2500 cans to be shapped to the paint factory in October. Have not as yet said anything to K. about your suggestion to try an acid condensing bakelite, but will do so in the near future. There is ofcourse only a small market for the downhill wax that you gave me the formula for last year. I think I have found the right people for the manufacture of wax, so I could go ahead with that now. But it is very difficult to get the right kind of containers for such small quantities. The fellow I was I was in touch with last year did not materialize.

Dear lob: bas eliveti recy Jasi mast a Jagued ve

ban of I wrote you last on June 10th (letter 62). We received your letter of May 20th, yesterday, and vere glad to hear from you again. He wax, we must know definitely that we can manufacture a satisfactory product perore we can go ahead and order tins. Even if I should receive your formulae for the different waxes now, I down doubt very much whether it is possible to put it on the market for the coming winter, without first having tried it out here (due to the difference in consistency of the raw materials in question, and also due to the lack of time, as most orders, as you know, are given in spring for fall delivery). However, I shall do my best when I, receive the necessary information from you. How did got make out the J.R. lacquer sell in Norway last winter? I am delighted to hear about the hovde skis, and that they intend to be governed by your suggestions regarding broad grooves. That sounds good to me, and it must give you a great feeling to know that your opinion is apprecia appreciated. I am looking forward to see your various vritings on your work on ski waxes, and I am vondering whether this is work that is appreciated by the university It is nice to hear you are busy, and that you have so may friends. Would I like to be with you on some of your trips? But who is Maja? Is that another daughter of an old friend of mine? I like to know her full name, and I hope you are using good judgment in picking out your frien Always compare them with Jo and Peggy. For goodness sake do not be too hasty in picking out a wife.

we were very glad to hear that kirsten is engaged, and that tante Tul and uncle Johannes are pleased. Give them all, including Georg, our heartiest congratulations. I have just written a letter to tante Agnes. Tell the other members of my family that the must get in touch with her if they want to know about us here. It easts too much to write to each and everyone. And there may be something in my letters to tante A. that would be of interest to you too, and vice versa.

The weather is extremely hot and mugg, and I envy your the dips in cold salt water. We have not been out much lately. Jo is going to have a holiday, and I hope she can manage to take a little trip. She will leave here mext weekend and take her bycycle with her, and I hope to be able to take mother out at the same time so we can close up and have no expenses here while we are analy. George F. told me that the fire came near his place, but they were not touched. We wanted me to come up and set a little fireshing some time this summer, and take mother with me. Maybe we will some day.

Arling S. was here the other day on his way West. They have had a very good start at Mansfield, where they bought a farm last year. His wife and Siriwill stay there while he is away. I have become a Norwegian Citizen. Now that
my papers are in order here, I want to come home
to the States. If all can be arranged in time
I could probably come with a boat sometime shortly
after the middle of September.

I have the money for the ticket, and so the main difficulty is in getting my American visa. It is required of me to furnish documents to the effect that I will not be a burden to the government (relief lefs.).

Could die be so kind then; as to send a letter stating that you would guarantee me financially; also it statement (eq. from the bank) showing that you would it it were necessary. Send it immediately by an mait via hisbon

Also, if you can, get a report from Dad, on Vack Rabbit, with sales for last year, and orders for the coming winter, and send it along too. If you wait for that, send it separately, by another plane

Dear Uncle Otto and Tante Walberg,

This is my new letter head. R. Amundsen and Co. are the makers of Bratlie Skiwares, and I have gotten a job with them with a view towards finding suitable substitutes for some of the raw materials they usually use, as well as with the intention of putting out new and better waxes on the market. The contract states that it is the intention for both parties to work together on the manufacturing of wax in America. I have protection for all my own waxes in the form of royalties, Not only that but, although the contract runs in its present that til the end of May, I am free to leave at any time the opportunity offers itself.

I have received your letter of Sept. 7. It was all required. I also received one from Dr. Langmuir, offering me a job working for him in his labratory.

It is impossible for me to get away immediately, but I hope I can make the trip in the not to distant future.

You notice by the address that I have moved again.

Now that I have a job, I am completely selfsupporting,

....and that isnt too bad when you know that for instance
neither Knut Meyer nor Eeif Christensen can find anything
to do.

Give my best to Ralph and all the family....and especially to Fran. Dad will know who she is.

Dear Dad and Mother,

It is not so long to Christinas, so I think I will send my Christmas greetings. How I wish I were home to celebrate it, but I guess that is too much to hope for. I can imagine New Years at Manitou.

But since I'm have, I'm making the best sout of it. I've got a very nice girl too, and that helps to keep me from being homesick too much.

the work goes ahead better and better, and at last I am within sight of the goal. Believe it at not I have a single was that goes on every conceivable snow condition good quide and good climb. It stays on allowell as "skare klister" and is applied with a brush as a lacquee. I am even working out a method to put it on cold and damp skis. Dad - you'll get rich on this one, and it's cheap to make!

Im still working for Bratlie, but that can't use it without a mutual agreement with me, as to royalties.

The lests have been conducted at all snow conditions from wet klister snow othrough cloq snow, to dry new snow at -12°C. At each condition it goes just as well as the best special waxes.

I am now busy making measurements of hardness, elasticity, heat conduction and water adhesion for all available waxes (about too) These results will be published along with the theory is proof, and conclusions in a thesis which I hope to have ready by the end of January.

then I will write a book on ski waxes from a little more practical and less technical point of view, for the dutters. Emiss book, with my article or chapter, on practical theory in waxing comes out in a few weeks; and I will earn a little for that too.

From Sørkedalen, to be with Tryque over the weekend. He has been living with me in town for the last month and a half in order to get his badstu exhibit at the Varemesse in shape. The fair lasts one week more, and then Tryque will probably hibernate at Rostjørn where. I will visit him often this winter.

Well, I have invented a new gleve now, and since R. Amundsen and company is also a reaspender shopy they can use 10 kg perdag this will carn approx 5 kg a day for me which will bring my vicana sup to A 50 Krimonth. But of it is really successful then we will go in the market Besides that Brattie had begin to make a skarevoke and a klasterook ofmine for which I they must gay me according to contract. I They will be forced soon to los my kluster too, so there is a chance that my insome will ge come ap to 50000 less kr month. I this is a dot more than any of my consens, and so I am really very proud thesis for ski war finished by the end of January. So you see I am really. Dear Dad and Mother ... etc.

I have just received your letter written Feb. 9. It is swell to hear from you all once in a while. I sure miss you all a lot but I must admit I have it very well here. It is funny to hear that Peggy is already a good Kook, and that Jo is thinking of getting married too....Things will certainly be different when I get back.

I have just bought a bicycle and today I came home with a new pair of skis and a CAMERA...Retinette from Kodak. At last I can take pictures. I think I can begin to afford a few things now. I expect I will have earned about 15,000 kroner from January to next New Years. Not bad for a beginner. In addition to my salary and royalties we shall sell a crisis shoe grease that I have made. I expect to clear about 1500 on that. But I have taken out a patent on a new method of making ski waxes...any kind...and I shall naturaly charge enough for the right to use it in Norway to cover the costs of a world patent...2000 kr....plus an extra royalty for each wax made in this way.

Well, perhaps I will be in a position to marry Fia by nextJanuary. You can believe me when I say she's a 'kjekk jente'.

I haven't seen the Meyers since before Christmas, so yesterday I had Knut and Inger up to visit me for aftens. Fia was naturally the hostess. I hope I made an impression on them so they could go home and tell their dear father about the progress I have made since I left them. I fed them with smorbrod cake, cookies, jam, coffee, liqueur and piles of ice cream.

Talking of parties.... I was out to Ferner Jacobsen the other day to celebrate Finn's birthday (25 I think). Swell party...reminded me of the party you had for me. Ferner Jacobsen is very kind to me.

Today I have been out trying a new wax. You can scarcely believe it when I say that I now have a wet snow klister, and skare klister in one. This is not so strange but may I add that it is in solid form and is as easy to put on the skis as an ordinary dfy snow wax. In other words the ideal wax for the public. In addition to this I have made a wax for all conditions except 'slite fore' ...ie. for new or little older snow from cold down to clog snow and even wetter. With these two waxes are all snow conditions accounted for without once using the old klister waxes.

Next week I shall go for a tour with Otto Toresen. We shall go up to Nore-fjell and be gone for four or five days. Easter will I be with Trygve up at Ringkollen. Einar will be at Lovlie and Fia at her hut up on Bislingen. You can imagine how I am going to burn up the trails. After Easter shall Fia, her brother Gerhardt and I spend a week up at the hut at Bislingen. What a life...what a life. After this I am going on a test trip up in Jotenheimen to try waxes.

This summer I will study specially waxes fats and synthetic materials. I have just gotten a whole pile of wonderful text books on my favourite subject. In the meantime I hope it won't be so long before I can come home againas the skiwax and badstu king.

Dear Peg.

Saturday evening we had a little party up here, and among the guests was a friend of Arne Finsberg. Arne had seen him the other day and told him that he had heard on the radio about your winning the downhill and slalom championship again. Well you can be sure there were plenty of toasts to my famous sister. I showed the fellows your picture and they were unanimous that it was a sin that you were married. Well perhaps they meant that they wish it had been you that had come to Norway instead of me.

Do you remember before I left home, when we looked through the Arbok, I had said that the first thing I would do In Norway was to meet Stella Dybwad. Well of course I met hex...even though it took a few months before I got around to it. Since then she has become a very popular actress on the stage of National Teatret. Her grand mother is the most famous living Norwegian actress. She lives in a hut about two minutes away from me...quite handy. Today we're we out making a movie. I was the leading man and she the leading lady. We were out for a skitour and waxed our skis etc. etc.. It was an advertising film for Bratlie. Some fun.

My job making waxes is still going well. So far I have survived all difficulties. I make all the waxes out of new materials as it is often difficult to get the old things. But just the same my new waxxs are as good and some of them even better than the old ones. I sure am glad I am a chemist. We expect to sell about 800,000 boxes next year. We will then be theleading manufacturer in Norway ... and that probably means the world.

Since I earn money now I have bought a camera, and so at last I am getting some pictures for the album. I also expect to get a bycicle soon so I can go swimming this summer, and take a tour to the mountains. I also plan to build a badstu up here, so I can have a bath after the evening ride up the 1500 feet to hut. It's sure a paradise up here. In the winter you can put your skis on at the front door, and in the summer you can pick blueberries the there.

But just the same I long terribly after home sometimes. What I miss most of all all is probably the weekend tour with you and dad, and then there is the annual spring cance trip. Well here's hoping that it won' be so long before weare together again. I wonder how all my friends are. Remember me to them.

Dear Dad and Mother.

I have just gotten your letter of April first and am glad to hear about Jo and To I have just come from my Easter holiday ... or wax testiing tour if you like. First I went to Norefjell where I toured and slalomed for four days, and had a wonderful t me with sun and powder snow, and kjekke norske jenter, b.a. the daughter of Kommandor-Kaptain Scholt who is a good friend of oncle Johannes. Fia was sick and spent a quiet time at her hut up at Roa. On the fifth day I went from Temple Saeter over Eggedal where We had stayed over the mountain down over Kroderen and over Holleia, into Honefoss and up to Trygve Brodahl at Rostjern. It took me 15 hours and was terrible going without a map and no trails. The snow was rotten in the middle of the day and I sank through at every other step. I spent a very happy evening with Trygve and continued the next day to Fia; where I stayed over two nights and recovered from my exertions of the previous day. Then: I took my leave and went down to Lovlia where I met Einar and Ornulf Poulsen and respective wives. When I came into the peisestue in the evening with my ukelele the nearly hundred guests what wild and shreiked and sang and yodeled. I had to sit up on the mantle and sing my head off about the old swance river and the old ski jumper that hopped 300 feet. Beth was there and was quite overwhelmed to see how popular I was among the skiers. The next morning I came into Oslo where I had to cook new wax for the next tour. I slept overnight with Einar, and early Easter morning we took the train to Otta. We were alone for there were was noone who would take a chance on the weather with us. Now that the tour is over they are all sorry they were not along. We went to Roisheim where we were greeted with flotegrot biff og ananas. There it poured rain and there was not a trace of snow. The next morning we went up past Elvesaeter up Leirdalen and into Leirvassbu. It is unbelievable that after only 23 km up the valley we found immense amounts of snow with -70 and sunshine. The Easter guests were just on the way out, and had not seen the sun infive days. But we brought the good weather with us. Wespent two wonderful days here, and had a fine tour up Smorstab breen. The next day we took atour over Kirken and upa bree towards Galhoppiggen and down to Spiterstulen which is now equipped with electric lights. The next day we continued to Eidsbugan on Bygdin. We were under way 12 hours in a snow storm a terrible wind again and terrible kladdefore. We experienced many funny episodes

I was so hungry that when I was still 200 meters from Eidsbugaren. and I could see the lights blinking to me, I took off my pack, sat on it and took out and and an old piece of smorbrod which Fia hae made for me a week before, and ate it. Thus I managed to drag myself the last stretch. Dinner tasted good that evening. We thought we were the only guests, so after dinner we withdrew in high spirits to our room where we played the ukelele and sang to our hearts content until midnight.. Five oclock in the morning a poor stakkar in the next room got up. He had not wax and got into kladdefore. He took 61 hours over Tyinvann. He missed his bus naturally and we met him later that day. Now comes the funny part of the story. We did not know who he was and we told him about the poor fell who couldn't sleep in the next room. He was a little mad but was in much better spirits after a little beer and wine, and we began to play and sing. He was namely a violinist. and you should have seen him play. Such fun I have seldom seen. I played the uke, another the piano, and he with the violin, Einar blew the trumpet on his nose and believe it or not one fellow played the base vid viol by rubbing thewindows . what a time. The the next day we came into Valdres where we spent the night at Lommen with The daugheter of Fred Olsen. What a place On the whole tour I took 110 pictures with my new camera. The wax tests were quite satisfactoriy, and we came home after seven wonderful days in Jotuheimen. The next day I bought a new sports suit (brown) and very snappy, and a bicycl Now it is much easier for me to get around. We have a full stock of raw materia fr next years wax, so my income is sure for at least over til next summer.

Love from your son,

% fru Akre, Voksenlia, Vestre Aker May 20, 194, Dear Dad and Mother, I have just getten your answer to my letter of one week after Easter. It was too quick to be true...nearly. I think that was the newsiest letter I have gotten to date. About the wax formulæ: I had decided not to send anything for several reasons. One or them is that even with the correct recipe you can go wrong, beenuse of the way in which the consistency of the various raw materials vary. If I could only send a sample of the wax then you could use it for comparison... and everything would be alright. It so happens that I now can perhaps send it all in some way or an other, and hope to do so next week. You ask always bout Fia. Well, she took so long to make up her mind that I decided it couldn't go...and so naturally dropped the whole idea.
We still see each other, and are good friends, but it will have to
be that way. Perhaps you think I just love em and leave in but just the be that way. Perhaps you think I just love em and leave to but just the same my point of view is reasonable too.

Kirsten is engaged to a fellow by the name of Georg Mauritz. I don't know him very well, but he appears to be quite nice. Kirsten is very happy. It certainly does a lot to go the little ray of brightness again into the lived of laate lul and Uncle Johannes. They show it too.

My work on skillayes is practically finnished now, and it just remains to write it up in detail... I have already written about 200 type written pages. I have cound that drie with broad grooves glide best, and so Hovde I have found that skis with broad grooves glide best, and so Hovde shall make all their skis next year after my design.

It is a wenderful feeling to see that some people have so much confidence in my work that they will change their whole production, according to I am very busy and am on an eternal rush. But I must admit that I like it. I have so many freinds that I can scarcely go anywhere without meeting semeone F know. Yesterday I was out on the bicycle with Fia and Tom. Townand I took a dip in salt water. It was quite cold...but wonderful. On the 17. of May I was up at Løvhie with Maja. We had a wonderful time. You'll probably hear a lot more about her later. Love to all

Dear Dad and Mother,

The letters are begginning to get few and far between now. I hope you get this so you will hear about my latest success. I have made a new soap which contains neather fat for soda. Raw m terial is plentiful here, so you can see that it can be of gr at value in these times. Lilleborg is the largest soap factory in Norway, and I have offered it to them. They have shown great interest in it and now want to buy it from me.

Teneriow I am making 25 pounds, as a larger test portion. At the same time I have to send in two alternative proposals.

I will ask for either....Kr. 10000 or Kr. 0.01 per Kile manufactured.

Doesn't that sound exciting.

I spent the whole day at the factory with the manager, who is really the scientific head too. When he mentioned Dr. Langmuir, and I told him that I knew him and hoped to work with him some day, he immediately effered me a job::::::::

This job was to continue my researches concerning fats and scap ersatz until the war is over. Well it is not aktuelt yet but we shall talk about it again a little later.

Did you get my letter telling about how I invented a method for pumping up termis balls (so they stay pumped). Well, I get between 5 and 10 krones each day from that too and am trying to sell it to Denmark tee also.

I have bought a good radio now and if the soap comes off, so will I buy a kayak.

I have moved into town again because we all had to move, but we hope to have another place up on the mountain by the fall. I don't like being in town at all. There is one advantage however. It is very central. I have good place for all my books and papers, and enjoy very much sitting down in the evening and doing some real studying on my spacious writing table. I have the walls covered with pictures of the mountains in Norway in winter. There is also a large picture of Roald Amundsen and one of Thorleif Haug. The radio is on the top of a bookcase and surrounded by my 14 prizes which I won the first yay year here. It is very imposing. On another table I have my albums. There are two in addition to the one I brought with me. All of them are chock full of wonderful pictures. On a really hot evening I can take a quick jaunt to Jotenheimen...gratis.

Well that's all there is for now. I hope to hear from you soon.

Love from your own

Well it is true that it must be difficult to keep ajour with anything so swittly changing, and I admit I am kind of baffled sometimes myself. Naturally I have decided not to do anything drastic as long as the war lasts. But now I think I really have found something. It acts differently on me this time. Instead of the usual firey enthusiasm. I find myself delightfully dazed and perhaps a little bewildined. Its funny that she reminds me a little of Fran. She is about the same height and build as Peg. She is a chemist in her last year of pharmacology. She has the same view point on everything we have discussed, as I. She drinks and smokes only on special occasions (quite seldom) and loves the out of doors. She comes from Kongsberg. Her name is Kiki Iversen. Her eyes are blue, her lips naturally red, and has awonderful disposition. She's NOT spoiled. In other words she was made for me. Tante Agnes had her birthday the other day. I came to see ther togethr with Beth. We had been to see Tante Elisabeth, who is not better, but not worse either. It must take time to get well from Poliomyolit. But she is remarkable to hold her spirits up, and smiles through thick and thin. Even Unvle Ole is becoming more helpful and thoughtful. That's a good result,

Vi kan meddele at vi har sendt bestilte ski til herr A. F. Adams, og håber vi at disse vil komme godt frem. Desverre blev det litt sent på grunn av de vanskelige skibningsforhold. Men vi fikk nu skibsleilighet via Liverpool, og går det sikkert 3 båter i mnd. fra Liverpool til Canada ifi. uttalelser fra Canada Pacific Railway Company & S/S Lines agenter i Oslo. Det skulde derfor kunde gå hurtig

Da Deres sønn var hos oss på besøk i forrige uke sa han at vi godt kunde skrive til Dem ad. skisalg til Canada for neste åreller sesong, og går vi ut fra at A. F. Adams i likhet med oss gjer= ne vil ha klarhet angående sine ski-innkjøp for kommende sesong. Det er selvfølgelig ingen ting i veien for oss å skrive på engelsk til A. F. Adams, men det faller oss lettere å skrive på norsk. Men firmaet kan altså skrive til oss på engelsk, det er greit.

Vi forstod at firmaet var interesert i våre ski, og særlig var interesert i å overta enesalg for Montreal. Deres sønn har prøvet våre ski og i likhet med andre løpere er han overmåte godt forneid med skiene. Det kan være morsomt å nevne at i kretsmesterskapet i slalam i Aker seiret Wildhagen på våre slalamski, det samme gjorde Per Larsen på våre slalåmski i Liv s landsrenn. Nu søndag vant den gode løper Paul Paulsen kombinert i Nydalens landsrenn og brukte våre ski. Kretsmesterskapet igår i Østerdal vant Eivind Kveberg med Jon Strickert på 2. plass, begge med våre ski.- Dette er bare nogen få av våre storløpere som bruker våre ski, og vi kunde fortsette å nevne flere 17 km. og 30 km seire, f.eks Tr. Brodahl og Magnar Fosseide. Vi vilde sjerne ha rede på hvilket antall herr Adams kan kjøpe av våre ski. Blir antallet tilfredsstillende kan han få enesalget for Montreal. Selger samme firma angros, slik at firmaet har reisende? Vi vil da komme tilbake til dette når vi får rede på antallet. Vi vilde gjerne har dette på det rene og helst spesifisert bestilling tidligst mulig for at vi kan ta hensyn til dette mår vi efter påske begynner vår nye årsproduksjon.

Vi håber at vi skal kunne levere til de priser som vi har satt op også neste år, ihvertfall tror vi at det kun skal bli ubetydelig differanse på de opgitte priser.

Samtidig kan vi nevne at vi har ydet kr 67 .- i frakt for de ski vi nu har sendt over Liverpool, de frakten denne vei sand= synligvis blir noget dyr, og håber at herr Adams er fornæiet over det= te. Fakturabeløpet var kr 867 .- , men har vi altså trukket kr 67 .- som anvendes til avbetaling på frakt. Vi har ennu ikke mottatt papirene fra Berg-Hansen & Co., Oslo som har ordnet med forsendelsen, men skal De nærmere bli underrettet når alt er iorden. Frakten må vi legge ut så disse blit tillagt fakturabeløpet når kassen kommer (1 kolli).

For fremtidige forsendelser vil vi gjerne ha ordnet med remburs eller betaling mot do umenter her I Oslo - hvis mulig. Tilslutt ber vi Dem hilse Herr Adams fra oss begge idet vi håber at der kan utvikle sig et godt samerbeide i skibranchen. Samtidig som vicken hillse fra Deres sonn som er frisk som en fisk og nn A Plagingot

Had went to a boys school last week wear where you were a bell hop once and ran of a whi weet for them and had a wonderful time. The yould not competitor was six years old and the oldert nine time. They ill seem to appreciate Mad very much There, and that makes him very happy. He certainly does more to motil The right principles of life and bushto in the rising generation than anyone elect know. He is a father to be producted of. Jorna and alice die hoping to be susried this much, but it is not certain just when he will get home. I like Torna inemenely - she is so natural - totally different from her oister Bartara, and so full of June. I she that developed into a far nicer person than she gave promise I robber young. She and to and Peg are good friends. Jorna went to Peggis for dinner the other night to have a lesson in cooking a dinner, greatly toosting Peggis your sister leggy and if fine is like her showing the all right. Youte ligher said she tiked the very much and found her viry with and restural. I only hope she does not smoke leggy and to do not. I say good night most I and I will add a few words. april 1, 1941. * 59 Mear Bob, - This is a beautiful surviy day. all the snow in Town has vanished but There tack from four lovely days of spring sking with lad. The were wirth up for a coupley days wear the Jaru where we hised & get welk when we lived up there. Then we bad a very nice time, sundine every about you. She is living with her aunt His S. in our cottage. His S. has been very ill with heart trouble for Three years and is terribly Thise. Is able to be up only half a day and can do nothing at all. She was so anxious to hear about you. Her Jather died tvery suddenly last fall hore an attack I sente indigestion at the age of 86. He was as spry as lever up to the last, and we heard rumous that he had taken unto him self a third wife during the last year, but that may only be toosis - his daughter did not say anything about that. Velua was not sking in short and bare legs which looked cragg, as it was a very cold day with a bitting wind The had dinner at the P. Jahn and saw 2 little Twin lambs took that morning - a black one and a white one only

Requires Persian rugo. no last night - she and her husband are here temporarily. She + said she would bring him over some every & meet us. I I smonder if he knows what kind of a prize the has drawn! To is going over to Peggy's & dinner tought and so is Barbara H. who is coming to link with no after Bill 33 goes. So at this present tomoment Peg is deep in the to y process of cooking the dimer. The both met to This woon to help ther look for a suit - she needs one very week Sand we want her to get it before Tom comes. To had so little the desirt have which buck, but any way got some fat the college. She thinks she will be finished and there by May, and there will have time & enjoy her home. The istrying to find a vacant lot nearly where one Scare hate a garden. She and Peter are both excited Sabout the idea. It would be good for him to work in Sa garden for he wont have any holiday this funner, I as he has just taken it in the dinter and faute agues & The were so glad to get your letters. The other day just after I mailed my last one to you, \$57. Com glad to know this real name and spreasthing about her family. She sounds very nice, and of she is the Pegfy obe much be nice. about your marrying - it certainly does not seem fearable until things are normal in the world again. Ceverything is so uncertain and so topsy therong that it is a difficult decision to make. You want to be fair to her in every may, and you do not want to bite of more Than you can thew so to speak, so it takes as lot of Thinking over. The have perfect faith

Letter#61 May 25/41. Dear Bot - It is quite a while now since wrote you last but lad has written succe I have been very trung getting the college Handicraft clut started and in making articles in our spicialties as samples & show to the stort here which is going to sell the output. The all worked like mad to have getting samples ready which To as manager turned in . To bur joy everything was liked very much, and to our greater joy Peggy received at 15; order for her word work and we a \$50. - order for our weterwork and a leather worker a 25: - nder - as a starter The clut has been started as an outlet for students and staff to earn some extra and necessary money by putting to work their various hothis, and you would be nuprised to see some of the lovely articles which have been tutured in . You receember the work to and I learned & do at Junior achievement club. Little did we restige then boromely it was to mean to us. The time and every which we gladly gave to the work at thatives wow coming back & no "sall messure and running bur" which

The had a visit last weekend from the going alf 21. The know the was likely to drop in some time. The liked him very much and the fine a very tikenthe enjoyed having him with us. as Watalist was away to the weeken we could house him overnight. He told us Jame interesting tales of his sea trips. He away drop ne The enjoyed so much your last newsy letter describing your wonderful Ceaster holiday. You are certainly fortunate? you can't think how lad went all ver the trip with you In mind, and To too knows most of the places. Whope with all your four and their liking I you and your sake don't let it swell. Please theep as truck and natural as you always have been - it would be an awful let down to find you different. fia is not the only star on the horizon after all! Hell, watch your step Bot dear and remember that a beforether serious times to be taking any sitch important step. The had a regular news reel from faute agues othere. Eletters the one to us and two of hers to Halbory which me sent \$100 to read. He also had received proprior fitter by botter and need had is avriting now to her. Heter Theare so glad to hear that tante Tul is much hetter and that they are moving back wito their own apartment. He thought about there and Herman on april 17 - that is my tirthday you know. That was a sad time for there Howemany said Thomas Here are all wer The world for the same Treason - what a terrible pity! When will it all stop! gon remember Registrical Barbarathone 3 oh is living with as now for the shipmen. Other leading Halifax tennis players will be back in the game again this season, but one familiar face will be missing from tournament play. Hughie Little, second ranked provincial netman and by far the pick of up-and-coming stars in the Halifax area, has been professionalized through his contract with the Boston Bruins farm club. It is for this reason that Hughie has failed to appear in Big Five tennis competition as a member of the Waegwoltic tennis team.

Despite their loss of Little in the presson reason again.

Despite their loss of Little in the Big Five League, which is the City's major tennis circuit, the Waegwoltic club is making determined bid for first place. The Waeg's Mrs. W. W. Flett has been undefeated in singles play and Jamsie Crease and Mickey Garten have been continuous winners in doubles, Mrs. Terry Creighton, Babe Stewart, Mr. and Mrs. W. S. Dunlop make up the jeam.

With three singles victories in a row, Bob Oxner is helping maintain the Cathedral club in first place. The club's men's doubles team of Clyde Myers and Aubrey Nicholson, alternating with Willard Turner, is as yet undefeated.

South End Weaker

South End, long regarded as the leading tennis club in Halifax and scene of many provincial tournaments, appears weaker this season. Clyde Sperry, Don Saunderson, Jerry Redmond, and Clary Harris are upholding the male end of the play with Isabelle Macneill, Muriel Lucas, Kitty Hogan, and Mrs. Jerry Redmond as the women players.

Sid Creighton, veteran netman of Dartmouth, is back in the game for St. George's club. Opponents say he still "covers more court than anyone in the world." Returning after a year's absence from the courts, Mrs. Dick Thompson tnee Joan Harris) and Mrs. Ellsworth Sollows (nee Betty Tolson) are playing well for the Saints. Mrs. Sollows, a former junior provincial champion, is one of the best women players in this part of the province.

The remaining club, Bedford, is an unknown quantity about 90 per cent of this club's players being juniors. At the moment Bedford is trailing in Big Five, but has played fewer games than the others so a comparison at this stage is not fair. ow the ontrols admin-il have courts, an sin-ul tak-er has st fall, fminton tunities admin-

There will be a new figure occupying the top executive post in skiing in this district when another snow season sets, in. The Laurentian zone will find itself deprived of its head man next week, when Victor Gagne, for the past two years chairman of the Laurentian zone, joins the Royal Canadian Air Force. Gagne reports for duction Monday, and follows the example of many fellow members of the St. Margaret's Ski Club, he being the twelfth from that organization to don air force blue. Just what steps will be taken to replace Gagne on the Laurentian Zone board is a difficult consideration at present. The skiers have been flocking to the colors in too great numbers to permit the laying of definite plans for next winter.

It is a case of "wait and see"

ing of definite plans for next winter.

It is a case of "wait and see" with the prospects being that 1940-41 will witness a greatly curtailed competitive season.

Under Gagne's direction last year the Laurentian Zone of the Canadian Amateur Ski Association experienced its greatest season on record, with more events, and more participants, than ever before. Gagne recently represented the Laurentian Zone at the annual meeting of the Canadian Amateur Ski Association.

During the past two years, as successor to Harry Pangman, he has done invaluable work in the interests of local skiing, and has contributed greatly towards the stable manner in which the Zone has operated.

It is not likely that any plans relative to another ski season will be shaped before next fall.

Overseas events have been moving to fast to look far ahead in a ski sense, although the sport will undoubtedly carry on as best it can. Skiing has lost many of its executives as well as standout performers of late sinc ethe call for service became more pronounced. In leaving the St. Margaret's Ski Club, of which he is a director, Gagne follows President Wilf Bernier to the air force. The latter was called up in the latter part of the winter. Bart Morgan, 1938-39 president, is also in the R.C.A.F., being one of the latest additions, that club having already sent Dean Nesbitt, Paul Pitcher, Kenny Wakefield, Don Fatterson, Eric Beardmore, Cecil Davis and "Sonny" Acer to that branch of the service.

Sking will also lose one of its foremost, figures in the professional field with the enlistment of Louis Cochand, director of the Canadian Ski School, in the Royal Canadian Air Force. He is one of many crack skiers who show a marked preference for wings.

From the Ste. Jovite area it is reported that two leading skiers from that vicinity will be wearing air force blue. They are Harry Forbell, this year's winner of the Taschereau race on Mont Tremblant, and his brother Charlie, the president of the Ste. Jovite Ski Club.

epiles that unless the sports promoters do nothing to get in the way of the national effort, sport should be let function in its outstanding role as worry-dispeller.

Racing, it is pointed out, is being self-rationed out of industrial areas. Football is moving forward to the evening so that it sha'n't interfere with Saturday afternoon work. Boxing is almost clamped down in London but flourishing in the provinces.

Then there's the financial angle to consider. Henry Cotton has raised over 12,000 pounds through golf exhibitions. Would, Macadam asks, Cotton have served the cause of his country better by sitting at home? The same goes for the footballers who have raised over 14,000 pounds and entertained many thousands of people in so doing. The boxing fraternity has raised somewhere in the 8,000 pounds range. Cricket has also added something. All in all, sport has contributed somewhere around 30,000 pounds to the war effort to date.

Then, there's the taxation revenue. Horse-racing earns the national revenue about 140,000 pounds a year by the export of bloodstock.

"Well," concludes Mr. Macadam, "do we need the dough or don't we?"

Behind the scenes is a brave chapter written by the athletic stars. The men who took part in the England vs. Scotland game that drew 75,000 at Hampden Park received two pounds each for their effort. Dater, another two pounds were added as bonus for the rich harvest.

There are other sport page yarns with genuine war flavor such as an item about one Herbert Ellis who arrived in London with a group of English racehorse trainers among refugees from Belgium. They were accompanied by their families and staffs of their stables near

Mr. Ellis, who has trained in Belgium for 35 years, said that many of the racehorses had been sold for meat in order to prevent their falling into German hands. Butchers were offering about 10 pounds for valuable thoroughbreds until there was such a glut of horsemeat that he couldn't even give his animals away.

Jockey Mann-In More Than Name Only

YOU don't have to write sports for long before you learn that top-notchers in any line of athletic endeavour get there the hard way. For example, there's flaxen- haired Frankie Mann whose dazzling rid-ing comeback at Mount Royal Track after an enforced absence of three years has made local history. In his first week riding the 27-year-old lad brought home 15 winners, four "places" and seven "shows."

He won the hearts of Montreal racing fandom as nothing has in years. For likeable Jockey Mann had taken a poke that would have been enough to make average guys like you or me quit the game for-ever. Three years ago he made a mistake which cost him a three-year suspension. He had earned the punishment and let the world know it.

Three years seems a long time to a chap of 24—especially when he is married and has a youngster two years old. But Frankie decided he wouldn't let it get him down.

He got a job on a track. His income was cut about 75 per cent, but he realized the hard work would keep his weight down for that happy day three years away when he would be able to don silks again. He managed to keep the "feel of leather" by exercising horses whenever the opportunity arose.

The three long years passed by. It was tough living in the dog-house of the sport he loved. He could have made good money touting but refused.

"For three years nobody was pulling for me," says Mann with a little sad smile, "but it's different now—and it feels good."

With eleven years of riding experience and three years of "just thinking," Frankie Mann started off the 1940 season with his heart set on a comeback—or a farewell to the track for good.

Lady Luck smiles on stout hearts and Jockey Mann's first week of riding on a wide range of horses, was the most spectacular ever seen in Montreal. Many fans who got in early in the 15-winners streak bet blindly on Mann without regard for the horses he rode and made money. It was noticeable that the prices dropped as more and more began "Riding With Mann."

Seldom Tried Method of Slump-Breaking

MANAGERS have tried varied stunts to snap a ball club out of a slump but here is a new one on us—that of having the home team go to bat first. We've never seen it done but Rule 26 of the International League gives the privilege of making the change to the manager or captain of the home club. The rule says:

"The choice of innings shall be given to the manager or captain of the home team.'

You probably didn't know until now that the chunky lad who ambles around the Montreal Royals' first base coaching line, "Red" Lucas, once carried a price tag of more than \$50,000 pinned on him by the Cincinnati Reds. In fact, Sydney Weil, when President of the Reds, turned down a cold cash offer of 50 grand from John McGraw for Lucas' contract.

Larry MacPhail, peppery boss of Brooklyn Dodgers, has always been that way, according to Gene Karst. When the United States declared war on Germany in 1917, "L.S.M." and enlisted by sundown as a private, By the time the Armistice was signed he was Captain MacPhair.

Jenkins is new and exciting — A cadaverous Texan with a high shock of tow hair who carries a couple of depth bombs in his two pale hands. The lightweight champion—and both of them hitters. The match looks so good that I don't understand how the Deuce of boxing came to think of making it. Conn-Pastor, the third bout in the line, brings together two of the most competent and skillful heavyweights now at large. Conn is a classical boxer, erect, fearless, and graceful, with the quickest left hand in the business. Pastor is a steady workman, strong, fast, and experienced, with a cool head and a fair right hand punch. This fight may lack the detonations of the other two, but it promises very well indeed.

Missing Weak Link

Missing Weak Link

Missing Weak Link

It's hard to say how Mr. Jacobs, the Deuce, came to form three such sterling brackets. Some of his buddies believe it arises from the fact that the Deuce recently acquired a new set of ersatz fangs, which champ together on an even keel and permit the Deuce to do a lot of executive thinking which might otherwise be devoted to keeping the upper starboard detail of his teeth in place.

Like most dictators, the Deuce of boxing has a weakness. Hitler, they tell me, eats hay. Mussolini rises only a limited distance off the ground, and Franco is scared of mice. With Michael Savoy Jacobs, the weak link has always been his teeth.

Searching for the set that would give him service as well as style, the Deuce combed the better bazaars year after year, visited the stalls along the waterfront to look for second-hand bargains, and kept a staff. of engineers constantly busy in his own private laboratory, experimenting with billiard balls. From an old Egyptian papyrus on the subject of phony fangs, the Deuce had learned that a billiard ball—specifically, the cue ball—if properly carved and lofted would supply a set of teeth second to none. The trouble is, teeth of this description are atavistic. They live in the past.

Thumbs Up and Down

Baer-Galento, if all goes well with Mr. Baer's nervous system, should be a classic specimen of the rough, dirty, braw ling school. These two pugs, the fat saloon-keeper from New Jersey and the retired cattle-butcher from California, are completely devoid of refinement. I have it on good authority that neither of them eats with his fingers, both having mastered the knife and fork and being the proud employers of cad-

Kjäre Otto,

Herman's son Bob var hos mig forleden dag i mit hjem i Oslo, og bad mig sende dig vedlagte papir som du bedes gi til Herman.

Bob er frisk og kjak og ser ut som sunnheten selv han har nu fåt job hos R Amundsen & Co, som skisnörings-ekspert; samtidig som han arbeider på laboratoriet ved Universitetet i Oslo med sine kjemiske studier, hvortil han får den finansielle stötte dette krever.

Bob sier han har skrevet til dig og bett om at du vil sende ham et brev å garantere for ham vis a vis de Amerikanske myndigheter, at han ikke skal falde disse til byrde, hvis han får innreisetillatelse til USA. Han han en venn i Lissabon sier han, som eventuelt kunne väre ham behjälpelig med å komme over.

Han har blitt anmodet om å skrive et kapittel i Norges Skiforbunds bok om skismöring, og er jo dette ganske erestående for en så ung og relativt Fremmet gutt som Bob.

Vi har det efter forholdende ganske bra, og lider ikke nogen nöd på nogen måte endnu, men du vet at hvis krigen skal komme til å vare i flere år, så blir det ikke lett.

Håper du har det bra: Tils Herman og Alice så meget når du ser dem.

vennlig hilsen

June 12, 1940 Dear Uncle Otto: We were all so sorry to be out when you called last night, but Peg was glad to be able to talk to you. I had a talk with Dad this morning and enclose the certificate. He and I both think it would be wise if you have a certified copy made for record, and send the priginal. However, we leave the matter up to you and know you will do your best. I hope things are all right with you and am so glad Ralph is doing well. Things certainly look black in Europe and we can only pray for miracles now. July 15, 1940 Dear Herman: I have yours of the 14th with enclosed letter from Alice to Walborg and pictures of Peggy and her fiance which we were very glad to receive. I am sorry my letter to Peg was not delivered Saturday as I sent it Friday afternoon. We would certainly like to be at the wedding, but I hope you understand that circumstances make this impossible for us. However, I am enclosing herewith a ten dollar bill and would like to have you buy a present for them from Walborg and me. In regard to the cable. I sent one as per enclosed copy, which I hope you find satisfactory. I could see no sense in having my name signed to the cable and left it off. I also cut one word out of the address and had the cable transmitted as a deferred message costing \$2.10. As I mentioned in my letter to Peggy the other day, we have decided to move to the country and I expect to decide on a certain house today and we will probably live in Port Washington, L.I., from September 1st or maybe not before October 1st. Good luck to you all and best wishes from the three of us. Yours brother. OSJ: ML

Mr. O. Smith Johannsen, ...

50 Church Street,

New York, New York.

My dear Mr. Johannsen:

The Department refers to its letter to you of June 24, 1940, concerning your nephew, Robert Smith Johannsen, and returns herewith the certified copy of a birth record which you submitted in his case.

Sincerely yours,

R. B. Shipley, Chief, Passport Division

Enclosure: Certified copy of birth record. D. SMITH JOHANNSEN 50 CHURCH STREET MARINE AND STATIONARY ENGINEERING SPECIALTIES NEW YORK DIESEL ENGINES MARINE EQUIPMENT TELEPHONE CORTLANDT 7-2010 mon of um the June 25 1940 Dear Herman: This morning I received a letter from the Department of State, Washington, D.C. which I enclose herewith. It is evident that the American legation at Oslo fully explained Bob's status and their decision not to grant him an American passport seems quite fair in view of the fact that Bob was already established as a Canadian subject. I suppose there is nothing further to be done in the matter. However, if you have any suggestions please do not hesitate letting me know. I am quite worried about Fred and how he is getting along in France. I know his hatred for the Germans who seem to stop at nothing to satisfy their greed and lust for blood. Yesterday I spent the afternoon with my friend Commander Riiser-Larsen and his wife. He is now Naval Attache to Washington and is negotiating some purchases of airplanes and some other war material. It was very interesting to hear about the happenings in Norway, and I will hear more as I expect to see him from time to time either here or in Washington where Walborg and I expect to spend a weekend in the near future. It certainly is too bad about Bob and that he did not leave Norway before the German invasion as I suppose there is nothing that can be done now and he is likely to be stranded there for sometime as none of us know just how long this war will continue. With kind regards, I am Sincerely yours. OSJ:ML

DEPARTMENT OF STATE WASHINGTON

In reply refer to 340.1115/20542

June 24, 1940

Mr. O. Smith Johannsen,

50 Church Street,

New York, New York.

My dear Mr. Johannsen:

The Department has received your letter of June 14, 1940, concerning your nephew, Robert Smith Johannsen, who you state has been arrested in Norway by the German authorities.

Mr. Johannsen's case has been considered by the Department in the form of an application for a passport which he executed at the American Consulate General at Oslo on May 8, 1940. In connection with the application Mr. Johannsen stated under oath that he was born at New York City on December 11, 1915; that from 1928 until 1939 he had resided continuously in Canada with the exception of several visits to the United States; that he acquired Canadian nationality while a minor through the naturalization in Canada of his father, Herman Smith Johannsen; and that prior to his departure from Canada for Norway during June 1939 he applied for and obtained

a Canadian passport. There is nothing contained in the files of the Department which would indicate that heretofore Mr. Johannsen had endeavored to establish American citizenship by applying for a passport of this Government or to be registered as an American citizen or that upon attaining majority or shortly thereafter he took any steps to become a permanent resident of the United States. On the other hand it would appear that since acquiring Canadian citizenship he has conducted himself as a national of Canada while residing in that country as well as on the occasions of his several visits to the United States when, he has stated, he engaged in skiing competitions and visited friends and there is nothing to indicate that he had any intention whatsoever of relinquishing his domicile in Canada when he saw fit to voluntarily apply for and obtain a Canadian passport to enable him to travel to Norway in 1939 for the purpose of visiting an aunt and uncle.

In the light of the foregoing the Department is of the opinion that Mr. Johannsen has lost whatever claim he may have had to American citizenship and it was found necessary to communicate to the American Legation at Oslo its disapproval of his application for an American passport. In these circumstances Mr. Johannsen must be

deemed to be an alien and there is no action which this Department or its representatives abroad may proprly take in the matter of endeavoring to intercede with the German authorities with a view to effectuating his release.

Sincerely yours,

RAShiple R. B. Shipley, Chief, Passport Division

D. SMITH JOHANNSEN 50 CHURCH STREET MARINE AND STATIONARY NEW YORK ENGINEERING SPECIALTIES DIESEL ENGINES MARINE EQUIPMENT TELEPHONE CORTLANDT 7-2010 June 24, 1940 Dear Herman: I have heard nothing as yet from Washington with reference to Bob. As per your suggestion, however, I have forwarded the birth certificate and asked them to cable the consulate at Oslo as soon as possible and that I would stand the expense of any cables in this connection. Due to the pressure of urgent business I have been told that it takes a couple of weeks to get a reply from the State Department. As I told you on the phone I had written Alice Elizabeth the day before telling her all I knew about Bob through a Mr. Overgaard on whom Bob called a few days before Mr. Overgaard left Norway which I believe was about the 28th of May. As soon as I have word from Washington you can rest assured that you will hear from me immediately. With kind regards. I am Sincerely yours,

D. SMITH JOHANNSEN 50 CHURCH STREET MARINE AND STATIONARY ENGINEERING SPECIALTIES NEW YORK DIESEL ENGINES MARINE EQUIPMENT TELEPHONE CORTLANDT 7-2010 Miss Alice Elizabeth Johannsen 1489 Mountain Street Montreal, P.Q., Canada Dear Alice Elizabeth: This is to acknowledge receipt of your letter of the 12th, with Bob's birth certificate enclosed. I have discussed the matter with the office of the State Department, Passport Division. New York City and was advised to explain the matter to the Main Office in Washington. I have done this today explaining in detail the actual status of the matter and the predicament which Bob is in at the present time. I merely stated that Bob was born here and had moved to Montreal when he was about ten or twelve years old, had graduated from McGill University last year when he signed on as a seaman on a Norwegian steamer and he had remained in Norway and had been arrested by the Germans for the reason that they suspected him to be a British subject on the strength of residing in Canada. I have not as yet mailed them the birth certificate but advised them of my ability to procure this promptly and that I would be ready to stand any cable expenses if the matter could be straightened out by cable or radiogram. We are glad to know that you are all in good health but we, of course, all feel depressed about the unfortunate European situation. However, personally I have faith in an ultimate victory for the allies over the barbarians. Let us hope that when they are beaten that the Versailles Treaty will look like a "pink tea party" compared to the next peace treaty. About a month ago I was told by a Norwegian-American refugee that your cousin Herman was killed in action fighting

About a month ago I was told by a Norwegian-American refugee that your cousin Herman was killed in action fighting bravely for Norway. I have since heard from the gentleman with whom Bob sent his message that he was killed in Oesterdalen and about 2,000 Germans were killed in that same battle. I understand from the same gentleman that the Germans have lost approxmately 20,000 men and the loss of the Norwegians approximately 7,000. He left Oslo on about the 27th of May and gathered considerable information. I expect to see my old classmate from the Naval Academy Riiser-Larsen who escaped from Norway and is now bound for Washington. He arrived in Montreal the other day and may still be there as far as I know.

The other day I spent an evening with Colonel Klingerberg with whom your father spoke in Montreal the other day. As soon as I hear from the State Department other day. I have had several letters from Uncle I will advise you. I have had several letters from Uncle I reacce and he is naturally very much upset.

With love to you all,

Your uncle,

Ch.

Durn Midnel 21 March 5, 1940 Dear Dad and Mother, etc. In the accompanying article, you find the Holmenkol races described in detail. Yesterday I sent the results by cable. I was not terribly proud of my result in the cross-country, but after all I was far from the last, and you know what the com etition is like. Also it is impossible to be in top form the whole winter. and I have raced every week for eight weeks. But my result in the jump I am very proud of. For example I beat Westbergh, and Sverre Brodahl. Hans Vingarengen beat me by eleven meters in the two jumps. But in points he only had me by three four. In the combined result I was #38, 12 points before the next man. But had I been 12 points better myself, I would have been number 31. m Well, the cross country is over now, and I shall now concentrate onslalom technique, so I won't be too far behind the others in this department when I come home. Although I have raced so much this winter, I am in very good shape now, and I haven't had a murmur from my heart. In about a few weeks I go to Galhopiggen. Then I take a tour of three or four days to Andalsnes for the Norgesmesterskap in downhill and slalom. I have developed quite good waxes, and never more use others I have even used my own wax inall except one race this winter, and Sunday it was as good as any other. I have just gotten an Air mail letter from you. It is wonderful to hear what Peg and Fran did at the Seigniory Club. I also received a lot of clippings, and the annual. A wonderful improvement this year, I think Everyone here in the family asks constantly to be remembered to you. Love from Bob P.S. By the way, I also received the ski handbook of Dad's. It is wonderful, and everyone here thinks we should have the same sort of thing here too. I got a letter too from Peg and one from Fran....both very welcome.

Feb. 4, 1940 Dear Dad and Mom, I guess the articles tell about all. The experiments are progressing and I'm finding out some very strange things! I visited mas. Murstad with Tonom two nights ago, and am going to a movie with Lille Gul tomorrow. Next week end - Ranfoss - Norges Mesterskap I received 200 Kr. Friday and tucked it away in Bergano. Bant. I used what I had left to buy much needed shirts and underwear. hove to all The last letter sounded as if you had gell had a tough cold etc. Trust all this writer and To tow! Peg does well this writer and To tow! How's the thumb? And watch the falls Dad, remember to act your age. M. 5.12.

onsdag 15, February ansmal. Well Dad, Here is some wax (sent in same mail). Try it out. It works swell here. Two kinds which should do for all bonditions Use what you find in the red tin for a base and use it even in very cold weather. It ensures very good climb, and has small Lendancy to ice. The other is rubbed in over the base, usually not too thick. If you ever slig back just rub a little of the base into your boax. Trygve Brodahl is trying it out here. Vack Rabbit is better Han Gsellin here. It doesn't chip near so much, and la wears very well too. Tomm likes it very much and I will get an "uttalelse" from hun before I finish. How is it going over there? Tem Rankin wrote before Xmas and Said they had already made 1200 time.

Well, I am going to take part in combined and slalom, at hilletrammar this Sunday + Saturday. Hope I do better than at Ranfoss. I will send a shortarticle with this letter too. By the way The mail is slightly delayed this way. I got your latest letter yesterday (Jan 8.) and in the same mail received a christmas eard written Dec 14, 1939. That means it took 8 weeks instead of the usual 12 days. Junday night, Jan. 21, 1940 Traveum Slott 10 Lille Borgensei 7, 1 Vinderen Vestre Aker, Norge Kjære Allesammen; I just got back from Drammen, and got your answer to my telegram. I was pleased with your answer, because I think it is just as well to stay until things go from bad to worse (God Forbid!) My anxiety was caused by certain political developments last week, and also by pressure by certain members of the family. Light couldn't go now, for I have just begun the most marvelous parties and life. It is a little tough, but I know I will never see with a paradise again. Here I live in a little but souly 100 metres from the big swooden observatory tower, which was built perhaps before you left Norway ... The snow has some in earnest, and everywhere, it looks just like the top of Tremblant in midwinter ment not so cold . Well, except that it you been unaireally cold the last Rev days (-25°C) with wind. Now I am established, and I hope that I can really get going with the sti wax problem next week. I practice station

almost every night with Burn, and Greataklen. Greta is my newest girl friend. Only 19, but looks much older. The is one of the best girl skiers in Norway. Yesterday I drove to Dransmen with Rolf Kaarby (who is one of the best combined men in the country, and the best in Oslo) for the meet up on Konnerud. It was 17 km. Magnar Fosseide won the langremm in I hr. flat Evanued was 2 minutes back. Kolf was 4 min back of kvanlid and I was 6 min back of him with 1:12. Well Fosseide is come of the best runners in the country, having beaten Trygve Brodahl by two minutes last week, so I was quite pleased to come only 12 minutes back. Remember the was open landsrenn and the real thing I was to 7 in my class and Roy was 30 entrants. It seems that they are specializing more and more here! The terrain was even nicer than Madmarten. I could hardly believe my eyes. Inh hi-h! My condition is getting better all the time, and I ought to reach peak in about 2 -3 weeks In I weeks is Norges Mestersky at Rotafoss I hope I do well there.

I hope I do well there.

I hope I do well there.

night in my strack. But I couldn't find my Jumping tis! I had left them in the care of the bakkeshelen of Midsteren; and how wouldy puts them in the Sti Foreningens boden in the barn of a little scattle at the foot. But I couldn't find them, and he was away so I managed to wake up at 6.30 there was no trykk til 8:15 and my train left \$51ban 8:00 50 I skied like mode in til Majorstuen. I got the train alright. The jump is up on tonnerud, on the edge of everything overlooking Drammen and the head of the fjord. What a wind (cross) and was it cold! There were 200 entries, including Berger R, who didn't show up because he wrecked hinself on Friday exhibition jumping for a Finland benefit. He landed on the land hat had best jump of 47 meters with / beautiful style. About half fell, and some badly, so The first round the juys was called off. They doubled out marks, and so there is some result for the combined. I don't know what I got yet but I will talk it on the end before I To begin with the distances were short,

since we had to of Kjøre op sporen. Rolf fot the best jump with 43 meters. I got only 36/2 but had a good steady jump with very good landing. (Lwas on borrowed stid, which were too light for the wind, and were none too fast). In class B, several fell, and there were tew good Jumps, so I think I came forward a little. 4th or 5th, and a Small chance for 3td (I bet I got 6th or 7th but I'm always optimistic .) Well then we beat it for home, where I arrived just in time for dinner with Tante Helga. There was your telegram, and a Christmas letter from Mother, Dad and Murray. Ontel Christofen was just home from a letter holiday up in hillehammer, not having been away from the office all summer Now I'll get busy on the article of Romonow I am going to tour up to Hone for to talk with Alme and Brodahl They have had deficulty in shipping thetomo shis But I think they start in two dispersons over hiverpool. Also I am going to see them about my jumping too, for they have broken in three places, since I have had them. When you hand here, it's no foolin. I hope to have frew langrein ski also for next weekend. Nydalen hore Bob. (Best to From).

ann Jebil Saturday night, Tryvann Slott 29th January, 1940 Dear Everyone, Since the last letter, which I sent a few days ago, much has happened. To save writing it twice, you coill see most of it in my article to come soon. I have 100 Kr. left, that is I did have. I was on the way downtown to take out another 50 Kr when I saw in a newspaper, stuck in a shop window, that 28 bags of mail had just arrived from Amerika, and which had been delayed for a five week consoring in England. I guess that's why I thought you had forgotten me. Well I quess one of the sacks was for me, for I got about a dozen letters plus papers, magazines etc., etc. It took about a day to get through it, and I havat really read it all yet. Day, that article in the Gazzette, didn't look too bad, did it! I hope you like the rest of them, and that you get enough of them. have done well enough so far to get anto Norges Mesterskap på Rantoss. That is about so hard as Holmenkollen. Was I surprised a All is set for my experiments. I am going to use the top of my but for it. It is just the right height. Tomorrow I will make some trial runs, In quite nervous as to how it will worken

but I think OK. I did quite poorly in Nydalosenn and Afterrenn på Midstrbakken. I queso I did to much last week. I'm going to rest this week only touch the statom skis after Holmenkollen Feb. 28 is Vikeround (94 meters). How does everybody like J.R. Is it going over, as not . Remember me to everyone, and than again for all the letters.

Jan 5, 1939 Kirkeveien 106°, Oslo

Dear everyone,

We had a party yesterday at Tante Helga's, for uncle Nickolei. (cousin of Bestamor, and Known as Counsel Smith.)

I had seen his picture in the paper when he came here from Helsingfors as a refugee from the Russians for the third time. He is 85 or 86 years old now.

Well, we were all ready when he arrived with Igenion Smith, what with whom he lives; there was a terrific knock at the door, and in he stormed. I was scared of him at first, because he was so much like a little wood troll, but after a while I had to laugh because he was an exact duplicate of all the pictures I had seen of Tulesnessen with his white gautee-beard and handlebar mustache. He grabbed everyones hand (not at once) and greated them, and shook them, and joked. Woro, I've never

Seen such energy this so strong, that I think he could make a football team, except that hes so small. Well the first I heard that made me wonder about him, was once Christofer asking him what he could eat. He was stere he could get away with anything. He was alright again! I, didn't know he had been sick. All through denner he got up and made wonderful speeches, in his Firmish Swedish, with Russian curses thrown in (at least that's the way it sounded to me) Afterwards he tried his hand at cards, talked politics with uncle christoffer, etc eta. He was a regular eyclone But then Ingeniør Smith told as some things about him, which I scarcely could bellive. As you know, he was very rich before he lost everything in the Russian Revolution. He managed. to get out with some valuation which he Bold; and so he managed for a few years But that money ran out: Since then De has been living in Helsing forms on 100 kg a month Am which he got as good will from Reder Forbund. He was once a ships megler). Some of the timo it was

nly 50 kr. Kan you imagine what he ate, and where he lived. When he had to run from the Russian bandets again there was only one place left. He landed here without an gre, hardly any clothes, and pretter near starved. Ingenion Smith (who is his consin, although much younger) heard about him, and took him in Stakkars Nick had runed his stomach but hadn't any money to go to a doctor. Brake a long story short he is fit as a fiddle now I E gave him zo to, because I thought it was the Least I could do. Now I am his andying friend. Sunday I race against hars Bergendahl and all the other farmers in Oslo kretsrenn. 17 Km. I can see then exactly where I stand. Now I am going to write two articles so 20 lang for now. love - Bob.

Next day! Today I made a new lacquer. I haven't tried it yet but I have put it on Leif's and Betho skins - God help them . Last week I made what I thought would be a good downhill wax, but found to my amagement that it climbed a little too! What I made today is in the same direction but should climb better yet. Imagine a lacquer that anyone can slop on their skis and go and without slipping! It it works it will be the ideal for towning people Will go over tared shis as well as love word Will Gold other war as well as xlister. I am going to try it myself on my crosscountry skip tomorrow, and will wait with that is over to send this so that you can know how it worked. The best of it is that it is an entirely different Type of larguer (a cross between blester and ordinary downhill lacquer) and it would be easy to patent, whereas T.R. would be not use to patent. Hope to move up with tomms early next week. That only be wonderful! Today I got Pegs birthday letter. It was swell to hear from you Feg and to hear that you are getting along so well. Also that Well Im just about running out of hewo now. It gress it's time for another articles or two, and so they will follow Shortly. So long until fomorrow!

Saturday's Well the lacquer was wasn't entirely satisfactory But today I made some warres. One of them went on the new snow as well as Osbye mix, but will stay on better. The other is comparable with thistervore, but shecause it is much harder and tougher, should Stay on better too! Old snow. 1 Bonorow morning is my first langreen about so minutes. I against four other chilo Skied Vestheim and Frigg. The next inorming is the jump - The jumping skis are fixed and I thenk they are alright. We have new snow - it is cold and fine. I tried out mix alone tought and it seems to climb alright with a fablakt glide. Smed no mail will go while Mon or Tues, I might as well keep this and tell the results in it. wow, am I excited. I don't think III sleep tonight. Adien - Sålenge. Well it's over and I didn't win, But I wasn't 30 far from it! # 2 in langrenn and # 2 in hopp. ie. I was no. 2 in my club in langtenn that means out of about 30. There were a hundred in the race and I figure I was about no. 6 out and it will be the Sull 17 km. We will see how that goes. In the jump I had 30% meters each jump. They were the longest But I was a little slapp from the race and To my style wasn't frisk nok å vinne. Blandt annet sløjeg Tacob kielland og Fritjot Pritz who won the krets resn last year. You'll hear all about it in my arrivels. So large Love Bob. PS. Tuot got Tos letters !:

er ikke så farlig (only a split up the back), Dommer Hans Eng fortalte mig å gå ned og hilse på Arne B. Christiansen (en av Kongsberg og han skulde greie det for mig. Desverre så han at jeg hadde de to beste hopp av dagen My nose isn't up! but it is nice to know when Sign. you improve, and your efforts arent wasted gordag har jeg klubbrenn i hangsen Det er 50 minutero namn. Dec.15,1939 Kjære Far og Mor og Jo, og Peg, og Murray) Jeg fakk for kr lørdag for geburtsdag min, og det gledet mig mye. Jeg kjøpt en flott gave for 30.00 kr. Det var sesong billet på ski heis Det er virkelig billig for jeg bruker den omtrent fire ganger om uken, og det hjelper meget med trening Tryvannskleiva er oplyst hver eneste kveld, ogsøg far praksis med Kristofer Berg, Andreas Wyller Turid Jespersen og Stella Dybwad og flere anderen De er allesammen møget flink. Tusen takk for gebuitsdag gava. Veg fakk to boker Sigmund Runds bok, og en som heter På Ståtkant. Beth ga mig en nye lær bånd for we min og jeg fått wind vanter fra Tank Agnes. For aftens hadde jeg reidar og fund has oss, og vi hadde det regat magagelig og koselig inbeider bestandig på Blinderen na, og Let meget interesant veg man meldet til Ready for de fleste av min venner står i den klubb. Idag hoppet jeg 53 moles på Mitstubakken fra bare halfart. They war to moter foram tall theilland og inm stil van langt bedre en jeg er vant

Jeg sende det som inholde, med dette bres. Hilse til alle min venner — og venninder. Love from your 24 årig son. 15. Veg fått brev fra mor og Fran på geburtsdag. Det var veldig spennende. Idag har jeg vært for en fint trenings tur op over Blankvarin, Fyllingen, Sandungen, og ned over Kikut, Kikutstua og Blankvanns. Det var pent kalt vær, og føre var fint. Jeg consentrerte på min teknikk, og det Kommer til å bil bedre. Jeg har tatt nye slalom ski fra Brodahtt og vente på at jeg ska brukæ dem først som Onsdag eller Torsdag tiden (220 cm.) Også skal jeg få noen langrenn ski fra ham, og de skal være 220 cm ogso. Min nuværende par er jo 215 men jeg få itte godt nok gli Bradahl selv Kommer til å bruke lengere ski nå Jeg tror jeg ska få dem gratis fordi jeg greiet ordre til Adams, og Maner glad å har fatt in skiene i Canada I only sent a start to peg for xmao, and a magasine to Fran. I don't dore spend more, but the thought is there just the same

December 7, 1939 Dear Everyone, Well, the snow has come for my birthday You know what it is like on top of Mt. Iremblant when the snow comes well that nothing! And with the snow everything comes out alright - Even if the Russians (I'd like to get my hands on Stalin + Molotor) try to come too. I've got my usual cold; this time it is much lighter. I stayed in bed today and will take it easy tomorrow too! But my training is coming along swell, my wind is very good and my pulse at rest is down too 55. According to a training book I have bought 72 is normal but in well trained tunners it comes down to 52-56. Well, what do you think of that! I am much themme thanto when I left montreal but weigh more ! But here is the king news. I have just read tonights paper and found a list of utdeler fra vareforsikring. My skå wax problem got 1500 kr. 500 kr more than applied for. that I had a lot to do with it Beca weeks ago I went to General Count Byerke

who is on the styrke and explainted my specify or is hopeless now I my theories and plans for & & investigation. He told me that last year he had voted it down, but that now 19 I that he understood more about it, he assured me 33 that I had not come in vain. Well 3 It looks like I start work now. First & I must buy up all the worker I can get. Can you send me some of Hi Speed dri + clog sus. Iwould like to compare it with the worker over here Then I must determine all the properties I can . I be up the lab. @ contact to of water & Ottraction for water 3 attraction for ice. A) hardness, melting point a els Then I must bruld my colon an top of tryvanno Hoista and carry out the new tof my experiments. Boy and I hoperry !!! I gress I fooled lante Tal The Sho sure I couldn't get anything going in here Well I have now! trologed had an orticle with last weeks experiences. Bot an o Asians for the pr. This. Hope to get Hope mothers eye is better Christ.

Kjære Allesammen,

Jeg har nettop fætt herlige nyhete. Det ser ut om at vi skal skaffe den penge om at jeghar skrevet om før, for undersøkese av ski smøring. Den styrke som skulle har møte for å bestemme forslag var begeistert, hørte jeg. Det er hemmelig, men jeg funnet ut alikavel. Det stæt blir en annen møte i løp av flere dager, men den vanskeligste er forbi.

Imellemtid fortsetter jeg akkurat som jeg var student. Jeg går hver dag til Universitet for å lese. Idag lavt jeg flere slags smøring for å prøve imorgen. Min laboratorium er i fjellern. Deti er helt privat, men plass er det for femti grbeiderer. Had fror du om den.

Sheen 'Kom' igår kveld. 30 cm

Ringkollen med Turid for litt slalån praksis.

Jeg D fikk svar fra Adams idag.

om at han var interessert i Brodahls ski,

og spurte han for priser. Jag telefonerte

Sverre Brodahl i Hønefoss og skal få brev imorgen

med full detalje. Kanskje kan jeg skafte et par ski for den tjeneste, høper jeg. Jeg venter fremdeles for brever # 9,10,11,12. Det var opbragte av Engelskemenner Dere dager siden, fra en drenske båt, men vi kom Venter at posten fortsetter snort. Så forstår jeg fra aviseties. Vel, Jeg må nå skrive min artikle. Hapen du liker den. Hertige hilsner

December o 1939 Kirkeveien 106 = 05/6 In the last week I have received about seven or eight letters. It is wonderful to get the news train home again. This morning I got your letter from Oct 26 in which you but me out heartily for having skipper so long without. After war broke out I was completely lost. Tante Tul and Unale Johanness took it as if it was the beginning of the end, and told me I would stay in Horten til I heard from you Well I waited - and waited. No word — and finally a mysterious check. I corote at first, but as time went by and to Figst his answer, and as the situation didn't change, I figured there was no we writing contil something turned up. However as you must realize I have written

a lot since. I am very sorry to have caused you so much anxiety, but I was no worse than I had it Well I have been having a long fight trying to raise money for investigating ski waxes It looks good now, and I wait everyday to see the notice in the paper that the money has been given. It is given by Vare Krig thorough Ski Forbundet. Last week I spent at Ring kollen training with Reidar Andersen and his three brothers. We tried in the but where listsky used to stay. You will hear all about it in my next article. I trained a tot, and will make a good jumper get. From Adams I have bought slavon hopp og langrenn I fra Brodahl, and expect to get them free for my sale and connection with ranada

EINAR BERGSLAND

I got a letter from Murray and Peg, this morning too. It was swell to get some personal news (and a & from Havriet) for hear about the jump and all the fellows! I am glad to see that Timing thinks McGill has a chance this year and I see from the paper that they will mais me. Well I am learning to much that when I come home I can whip that team into stape so that I amonth will run away !!!

transiers and expect they will get

Kjære far og mor, Meget har hentet idag. Først jeg fikk min officiel opholds hlatelse; V. Aker, foreløbig til 4Mai (½ år). Det kostet mig 10 km. Min næste skritt var å besøke Einar. Jeg kjøpte noen orienterings sko som jeg må ha foråtrening og, fordi det er min mening å deltar i orienterings konkomansen om vårn. Jeg håper å introdusere den kjekke sport til America. Det kostet mig 25 kr. men det er "bargain". Da kjøpte jeg noen langrenns stavet. Jeg er sa spent fordi det er den besten par staver jeg har moensinne eiet. Det kostet bare 5 kr. men det var ikke tegelmessig prisen skjønnerdu. Da kjøpt jeg a langrems dress av ullgaberdin kurat som den Norsk lag i langrenn bruk Det ir jo eta ka fra kneen til hal.

Du kan se på den i bilder i Albok, som du må see also pæturel of Rjakan which you can use for ski ways.

Kjære Allesammen!

Dit flypost lavt ny verdens' record.

Jeg fikk det nettop nu, pamtidig med almindelig brev fra mor med clippings og printed matter, som var sændt næsten samme tiden. Men noget er bedre en intet, og det gleder mig meget og løre på mye almindelig nyheter fra hjemmet. mitt.

Jos arbeide ser ut meget strålende fra her og hun skal sikkert bli heldig tåper Murray har fått stilling na. Det rulle være så triste hvis han måtte forlatte to ovelsket to sin. Hils til Harriet. Tomm han gatt til Riukan for tjeneste,
og det et mulig at jeg skal snært
besøke ham for litt stunde, hvis
været et pent nok, og snæn er dypt
nok.

Skismøring, og har planlagt flere experimenter og alle detalje nødvendig om for å planle bevise det, sant eller ikke

Jeg håper å begynner snart på Universitet med den.

Nu går jeg til Emans'

Jeg knottat brev fra Fran, men ingen ting fra Borb for lenge siden. Jeg høre ofte fra Jean Van Hoven, og Franziska, og igår fikk jeg paket fra Franziska. Det var gave for "graduation" og inneholdet flere vakkert skjerfer.

Igår kveld besøkt jeg Turid

Jespersen. Vi danset og hadde

det alt i alt en strålende, kjempe fin

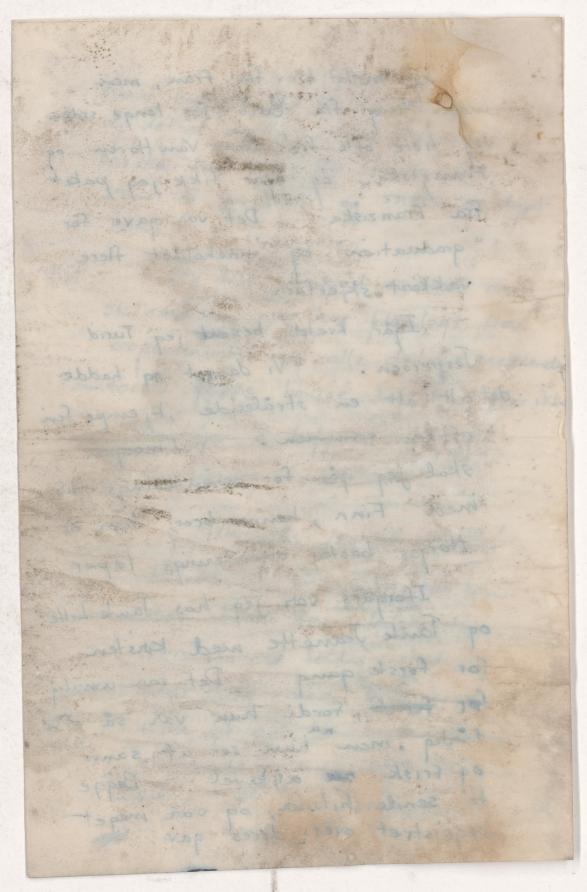

aften sammen. I morgen

Skal jeg gå for orienterings tur

med Finn, hennes bror, som er

Norges beste orienterings løper.

Iforgårs var jeg hos Tante Lille
og Tante Jeanette med Korsten

te sende hilsner, og var meget
geistret over deres gav.

Kjære Far: Was used in Aftenposten. Monday, perhaps Sat.

Here is another article. Did you receive those about sigmind Rund and Oscar Gjøstien. The picture with this one was featured in Aften posten.

I have Kr. 127 to my name, and I hope my articles will keep my head above water until Tack Rabbit gets going: I simply won't borrow from Onkel Johannes and Tanke Tul. My personal opinion is that Tambe Tul is a bit stacked and Herman is a ship off the old block. It is her hawtiness which as done a lot to widen the breach with the Meyers. Well I honestly don't feel any too welcome living with Herman and Kristen, and I can easily See that Tante Tul has been around to them all filling them full of a lot of hot in about the difficulty of the situation, it small partment (it seems fine tome) to etc. So as much as I can stay away the better I get on, and the sooner I move away the

better too.

Tomm left yesterday for Rjukan for an extra 45 days miletary service, and he will be back in about 31x weeks. We plan to live together in a little bungalow (two rooms + garage) up on Holmenkollen near Frognerseteren. I can live with him there for nothing, and can ski uto town each morning for college. I will continue eating my midday meal at Frøken Coreijs Studenter Hjemme (1.78 kr) In return I write his articles for him which he sello to news papers in America, and help him by answering the telephone when he We will certainly have Att Pour together, and it will come in more than now, and will remove all frotion from living with that mut Herman. Yesterday I went up to trignerset en with the at and Tryque Bradahl for badstu Ca a so watch for him Love to you all.

Kjøre Allesammen Well a lot has happened since you last heard from me. For the last couple of days I have been running on skis, around this glorious country above the timberline. Real spring snow, and enough to got around on. Here's how it all happened. As you probably know from my last article, that I spent an evening hos S. Rund. Isbjørn called and said that there were 40 cm. one up here. Since I had done all I. could in Oslo for a while, I decided to cons here. Only 5/2 kr aday with hed A of the most wond neals you yet, so we don't jump. The is not cally enough for good station for, but it is good langrenn training. I can

imagine this place with his metres of snow over everywhere. Here's how things stand in Oslo. I can't get a job whereby I earn money directly - I can't get arbeide tilaterse. To I couldn't work with Bjerke. But now another possiblility has loomed up. I may work at the university after all - studying the theory of Ski waxing! There is already a doctor of Chemistry who is working on the problem, and he will gladly have me work with him. He sees no reason why It shouldn't count towards a degree. Imagine that! But now I must wait until Dec. 1, to see the final decision. Now do you understand? loday I went on a tou over to the and back over the his country. I had for company a soldier. I quess I togot to tell you that I are six soldiers up here with nothing to do but

eat, sleep; ski and watch for airplanes. We had a tour through what was paradise to me. Perfect spring snow, rolling country, and just a pine tree here and there, a trozen pond and a hutta. 0-0-0-0-0h ! I hope to stay until Sunday when lomm hopes to come back, and I can drive back to town with him. As soon as there is enough snow in & Nordmarken I am going up to train with lygge Brodahl at his hut near Honefoss (50 km from Oslo). He a badstu og to hoppter Tenke på den l I got a letter from From today It was mailed 12 Sept. 1 , but the censor could I have approved of what she said . My address is fremdel tarkereining Oslo. I received 40 Kr. for my first writide

Den gamle festningen til Wedel ligger litt nordvest for byen på en høide med vid utsikt over omegnen. Stedet hadde stor strategisk betydning ved Glommas kjente «kne» og innfartsveier til Sverige. De gammeldagse anlegg blev endel modernisert for endel år siden og har været brukt under sommerøvelser. En nyere festning er bygget lenger syd og var klar til tjeneste i 1905, men er siden stillet i reserve.

produksjonsomkostningene som følge, altså øket dyrtid for alle andre befolkningslag. Makter Landsorganisasjonen å gjennemføre sitt krav betyr det utvilsomt inflasjon, og ingen vet hvor vi da ender. En hovedinteresse for det norske folk er det idag at prisnivået holdes så lavt som mulig, selv om det skal koste redusert forbruk for den enkelte. hvad de fleste utvilsomt kan tåle. Som et direkte angrep herpå må man se Landsorganisasjonens egoistiske krav om øjeblikkelig kompensasjon.

Når man bortser fra Island, utgjør hvert enkelt lands samhandel bare 12 pct. av den samlede utenlandske omsetning. Også mellem de nordiske land innbyrdes har vi restriksjoner som toll, kontingentering og valutakontroll. Dette er nødvendig av hensyn til mestbegunstigelsesklausulene våre traktater. Man har tenkt i fremtiden å få inn i handelstraktatene en skandinavisk forbeholdsklausul, men dette vil ta lang tid. Well I haven't been arrested for a spy yet, but the to be plenty scared of them. There are stories the newspaper, and sentires everywhere. This morning I scraped one of my racing skis down till there was no trace of klister, and then put lacquer. Getting ready for further experiments already. But Isten to this! _ The lake had changed from red to more of an orange. The colour is fast in the solid dried film; but in the solution, either the due decomposes oxydiges, et or undergoes some other reaction or change. Eg. that dye is not altogether satisfactory. I I don't think you have yet made any of the lacquer! If not, tell s gran voi sim Rankin about it, and maybe he will suggest a better dyes and the lake is just as good, roznos biopis some people will think that the will think to colour means the larguer has decompose and you can fix this up.

I have already sent 2 articles. like them. also some pictures. Jeg har en små renninde her i Horten. Blond and Blue-eyes. I have taken her to the once and often cycling. Dear Dad,

Very sorry to hear about Hambrock's brother's death.

They are going ahead with the sk tows here, and we are all waiting for your detailed account of Pabst's outfit. I am glad to know that J-R is going ahead. If we get peace instead of war, then I will go ahead with it here. Bergs land suggested it himself. I won't have to put up any money, but will only get so much far each tin. Of course it is the new sample tin I want. Thanks for all the letters and cards enclosed. Interesting from Sidney. Enclosed you will see a picture of your brother which appeared in Morgen bladet yesterday.

Re: Wax over laequer.

Growse the interruption but I was just out on the street and saw that war was declared. Terrible 1/1*1

Well, in the first place you know that I have been in favour of using lacquer on touring skis, but have experimented but little so far along those lines. You have had considerable success.

Here in Norway, lacquer was introduced about 1933 by the swiss skiers. Bergsland and all his followers immediately began using lacque on their towning skis, with inix over it. They had much success! They found on further experimentation that this could very satisfactory for cross country racing! But here the wax were of quite rapidly at first. Then they found that for some reason they cannot yet explain - that if the ski was First Hacquered, and then waxed, and then taken for a little tour, to wear off some of the excess; and then revaried - this time the mix Stayed on as well as they had expercenced in any way before! One boy used larguer in the 60 km race from Allehamar . ie he had lacquer on one ski and bare wood on the other, and of course over the top of the each he had his langtant wax The lacquered ski stood up as well as any of the others using far or klister bases while the bare wood was unsatisfactory Many other racers now use it re, One of Ginar Bargelands last races was a military Staffete race. He used mix, and came in

The great advantages of lacquer, as have been found here are that: O In variable snow danger of icing ion eliminated Do you remember last years Tone race. Herny vontilmen bid very well Well I used his skin later at the intercolle at the Margorarete, and noticed that the bottoms were heavily coated with lacques Was I a dope. I deligently scraped it all off and then runed his skie for more larguer by burning in far. The majority of runners one here of course still favour, burket tan loose, partly because many have never tried the other, and partly because it is really better in some conditions. However, Einar tello me, it the wax is put on properly, and enough, over the lakquer, it can be most satisfactory Clogging snow, after a long climb for example, is very easily stuffed off ... Usually gives a much faster gide. It is the lack of this last quality which has bothered me most in last years races; never once did I get a good glide The base is clean, and does not mix with turther layers of wax. The wax may be easily removed by gasoline without interfering buth the lack.

to beapt interest in Enclosed tind spound andre in I to so words but because If it can be used in races, certainly it is is good enough for towing. Furthermore, the I very qualities which to home listed, are the It & B; ones which are sought for by the towers. We are hoping to solve the problem onse. I said for all this writer by by " using an 355 intermediate was, to give lit greater adhesion 3 and better glide. My new downhill 3 H waxes that you remember, I think are perfect, it get you know how well they stay on. You saw with the speed at Washington. Well it is also so very hard, and goes on, in avery thin layer. This is just what will she the problem I thinks Well, anyway now you know what I think and have typ my shave you also know what I has actually been done (post tense) over here. in In view of this, I don't think it would be for right to publish anything like what you mentioned 3 to 3 in your last letter, about lacquer being out I hope you will be attention for fouring. I hope you will be attention of 3 3 3 thous whom the problem concerns. FAH to skiers who town - and that the ste manual, and annual. have not time to write Percy Longlas article on sti songo . Peg will have to do it!

Dear Dad, Mother, Reg, Polly, Bob, Florence, and To when you get there,

What a ride ! The fellows are all swell, but some of them are prize cards. The boatswain didn't have time to wash for meal no. 5 tonight, and so there he sat with a trag in one hand to wipe off the dirt from everything he touched. He tasks in short sharp sentences, which is quite a contrast to the his friend the carpenter who sits across the country (I mean table—where my mind anyway?) and who remaids one of a cleetic gramaphone on a nonstop hop.

Dear Sir,

I beg to refer to your communication of the 19th instant regarding a letter mailed by you addressed to your son in Norway.

When instructions were issued as regards the suspension of mail services to Norway all mail addressed to that country, some of which had been posted some time previous and thus was en route to its destination, was intercepted and returned to the senders.

It is expected that arrangements will be made in the near future for the resumption of mail service to Norway, either direct or through the medium of Thos. Cook & Son, Ltd., the official intermediary, but as no arrangements exist at the present time for the transmission of mail to that country, I am returning the letter addressed to your son.

Yours truly,

Encl.

Hills, Thrills and Spills

There is an organization on the campus which proudly boasts of a membership of over one hundred and fifty students. Their distinctive red and white McGill-crested "M.O.C." arm badges are to be seen in ever increasing numbers wherever skiers congregate.

The McGill Outing Club, as it is called, is an outgrowth of the McGill Ski Club. Due to a little technicality, the M.O.C. was disallowed from using its old name "Mc-Gill Ski Club" when it was found that any student body on the campus bearing that name must limit its membership to racing skiers belonging to the McGill ski teams.

At any rate, in past years the membership of non-racing students proved to be rather mythical as the only people who were benefitting in any way from the Ski Club were the members of the ski teams. So this year, after suitable agitation, a new executive was put into office and the

McGill Outing Club was formed.

The main task was to inspire confidence and to show that the college could offer something to non-competitive skiing.

The most glaring fault tackled was

that of the modern tendency to make everybody ski-tow addicts. So many students have become accustomed to expecting all their skiing enjoyment from expensive equipment and give it the hardest wear, that they have become veritable collectors of ski gadgets or exponents of muscular control, instead of realizing that skiing was meant to be a pleasant means of getting around.

So a very important function of the Outing Club's program for this year is to teach McGill skiers why, how, and where

to use their knowledge of skiing.

The thrill of riding skiis on carefully prepared trails at high speeds has been "played on" for years, but quite comparable with this is the thrill of climbing a great hill like Grand View or Loup Garou and having a story-book panorama spread out at one's feet to review. One doesn't need to be a "Kannonnen"—much less a possessor of expensive equipment—to enjoy the joys of skiing to the utmost.

The acquisition of Mr. H. S. Johannsen as chief guide and tour technician and also the aid of his daughter Alice is just one example of the Club's good fortune. The "Jackrabbit's" knowledge of Laurentian trails is second to none, and thus by eliminating fears of getting lost, with the leaders carrying first aid equipment, waxes, spare points, etc., the hazards of trail skiing have been eliminated.

To date five tours have been run off. The next and longest one is scheduled for the "long weekend" when a proposed trip from Labelle south to St. Sauveur has been planned for.

With regard to future tours, the committee is beginning to wonder how to accommodate all those expected to patronize the spring jaunts-the time of the year when touring really gets under way.

Apart from organized ski tours, much *has been done along other lines. Suffice to say that seventy-two racers are working along with ski-school instructor George Swinton to form the largest and best "farm"

school the ski teams have ever had,-if only there was a coach to use all this willing but undeveloped talent.

Then each fortnight ski movies are shown. The M.O.C. has its own ski-school, while the Interfaculty Ski Meet, the "Snow" Ball at the Park Slide, etc., are all Outing Club activities.

One last word concerning non-competing skiers. These tours are for students who like to ski. If ski-tow skiing is the object, the Outing Club won't be any help, —except perhaps in running a boycott if that price on the tow is increased to \$1.50 per day...

The Club is primarily for touring skiers who like their skiing garnished with pow-der snow, and who like to do it on the widest, cleanest open spaces in eastern Canada. It is for those who wish each skiouting to be an adventure in new country travelled, new trails run, and new friends made who will mix with the old.

Ski Heil!

Kjære Herman! Mange tak for det brev av 1. januar og likeså for Sweet Caporal Skiers Book, som jeg skal studere i detalj ved leilighet. Ofter kartene å dømme har dere jo et fint skilereng i Canada, og jeg ser mes broderlig stoethet at der er både mountains og løiper som bærer navnet Johannsen. Jaag er det Holmen kolldagen, og jeg håber Bob vil gjøre det bra. Jeg skal lytte i mdio kl. 13. Han var med i skilopet på Raufos for 14 dage siden, og da hørte jeg ham nevne i radio reportagen. Savid jeg vet har Bob gjort det bra ved flere anledringer. I Asker fik han visst 3. pr. i sin klasse for en hid siden. Hen alt dette skriver han nok om selv. In må ikke ha nogen bekynninger med hensyn til Bob og betaling. Han var Kermans og Kirstens gjest, da han bodde hos dem, og jeg har sagt ham at han nså betrakte vort hus her på Horlen som sit hjem, så hit kan han komme når somhelst hvis det skulde bli dårlig
