

with us and the car started  
Johnson as he would and then started  
to the dance. Luckily there was no program  
and nearly all the men were late so nearly every  
one went to see the fire first. I saw some  
crowds before the evening one man to have turned  
out. At King and Bay about 10 o'clock I went  
and then met ourselves as a walking man  
so forced our way through the crowd but that was the only  
way you could get through. ~~The~~  
we had some very good ice skating  
on the Bay before the snow fell and in New Year  
day we skated over 12 miles but no snow still.

Large fire was burning so thick  
we town to see it. There has been  
big fire since the Varsity so I was  
going to miss for any dance  
down to the corner of King and  
Bay and saw part of it from there  
as it was burning the block lying  
between Bay Wellington Melinda  
and Jordan Street. Then as it  
burnt south toward Wellington  
I went to the corner of Wellington  
and Bay where there was a fine  
view. There was a high wind and  
the waves of flame were very  
large and then eventually  
rumped across Wellington St  
and set fire to some warehouse  
and but these they cornered it  
and at last got it under after  
burning from seven to half  
a mile. By this time the top  
was held and the air rose  
to fall so that all the trolley wires

Upon after words and then  
I turned soft again indeed  
after every snow fall there has  
been rain and it looks ve  
much as if this one also will  
turn to rain before it ends  
Ella has come out but I can't  
say I advise her any self  
she stops just as much as  
ever and looks as if she  
really couldn't exert her  
self enough to live and  
very nice though. and is quite  
a contrast. When are you  
coming out here again or  
have you quite taken root  
there among all the painters  
and painters. I hope not  
how I must close as Mother is  
going to enclose this for me  
with heaps of love

Periton

35 Avenue Street

Jan 13-94

Dear Mr. Cline

I am so sorry not to have  
written before to thank you for the  
beautiful amplex it was so good  
of you to take the trouble. The truth is  
that I have been so busy during  
today and there have been so  
many donees that I have very  
little time to my self at all.

Today it is morning hard and  
I should think fully six or eight  
inches have fallen since morning  
and it is just as stormy as ever  
which makes the walking very  
unpleasant indeed.

There was a dance at Government  
here on Thursday but in the middle  
of it we found that another
