(Letter to Dr. Cushing)

(handwriting)

July 25 (1903)

GLEN VIEW,
ST MARTINS,
GUERNSEY.

Dear Cushing

Thanks for getting the books - do cut all that need to be sectioned - I have not got the "uncut" variety of the disease! So glad to hear that all goes well with Sister Kate - We shall look for good news very soon. I have got two copies of the '43 edition of the De Humanicorporis fabrica & have just ordered a third. We cannot have too many copies in America & no Medical Library is ~~complete~~ complete without one. We are having such a nice quiet time here - the weather has been perfect. Mrs. O. is not at all well - wheezes still like the deuce, but has been better lately. To add to her discomfort an uticaria of ferocious quality has landed upon some 3-1/2 acres of her back. Revere is very jolly. I wish you could take a header with me about 11 this am - high tide & ~~not~~ ^{about} 15 feet of water off the rocks.

With best wishes

Yours

W.O.

The folks went to Barker is a wonderful present and
one to me. I have four copies of the right
on his dinner room table and a few more
in the MacCallum house to me for about.
