I was sending you the Harvy Diploma - but Rolleston says he has sent it. I have tried to head off your copy but if I fail - & it has gone - do what you like with it - some library preferably. I have sent to Med-Chair. & to the Hopkins. I am sending you instead a ~~Scientia~~ photograph which will interest you. I am looking up his life - intensely interesting.

Love to the angels. all four & best wishes for the new year. I wisht you were here.

Yours

W OSLER

My greetings to your father & Ned & Mrs Ned
