(Letter to Dr. Cushing)  
from Mrs. Osler)

Feb. 28th ('08)

"Open Arms"

Dear Harvey C-

Dr. Ogston of Aberdeen took these the other day, he was here lecturing. Send them to you because you always know what to do with small pictures when you get them and I think the one of Dr. Osler in the library door is so good that you will like to have it. Thanks for the article on Baltimore Bachelors. I hope Amy Gwyn arrived in time to rescue Tammis from designing friends - one other Tammis we must trust to the mercy of his friends - I feel rather anxious now that he is away from Kate's vigilant eye. I hope the darlings are well - it broke my heart to hear that Willie P's had had trouble with his ears. Last year Revere had a bad ear after a cold and looked so sad that it made me really ill.

Revere is up to his father's ear and only twelve, evidently he will be tall like my brothers. I am hoping to go abroad with him for the Easter Vac and let him have a month in a French family - Dr. Osler is going to Vienna for a meeting. We have just been to the last of four very amusing lectures by Herkomer. This one was really the only one in which he spoke much on art - and talked a good deal of Turner, he is a most easy & charming lecturer. We have been in the agonies of a series of formal dinner parties - and have polished off 84 people in 3 dinner parties - My strength has given out and no more until spring. We are having Marchy weather but the bulbs are courageous and many things in bloom already/- Best love to Kate and squeezes for the darlings. -

Affecty

Tanta Grace

Are you eating properly & having tea Fridays.
