Osler

From the Regius Professor of Medicine, Oxford.

Dear Harvey C.,

I have written to Heger, asking if he knows anything about the suggested edition of the Tabulae Sex. I am a little suspicious that Sudhoff is rather just trying to push the Munich man out of a job and we should know definitely before beginning anything. Do please try to arrange to come over for the meeting. A winter holiday would be very satisfactory. We could go together to Brussels; then you could give us the address at the Royal Society of Medicine.

Love to the family all,

Sincerely yours,

WM OSLER

W.H.E.
