

(Letter to Dr. Cushing)  
(typewritten)

CUS417/52.103  
1, December, 1914.

Osler  
W

From the Regius Professor of Medicine, Oxford.

Dear Cushing,

I have yours of the 9th. I see no reason whatever why you should not have some sort of celebration. As I wrote you, Heger has asked us to put off the London one. I daresay that then we can probably catch you. Cullen's paper is first-rate. What I think you could do would be to deal with Vesalius from the standpoint of the anatomist. Spielmann is going to deal with him from the artistic point.

We are very busy. I wish you could be here at some carving on these brain cases. It would pay the Government to give you an aeroplane and an outfit to go from hospital to hospital!

Sincerely yours,

WM OSLER

Love to the darlings
