Oster W

(Letter to Dr. Cushing)
(handwriting)

(July 23, 1916)

23rd.

13, NORHAM GARDENS.
OXFORD

Dear Harvey C.

I will look out for Miss Fitz^(gerald?)

I have sent on your letter to Keogh. I am sure we could place 50-60 good men in the London Hospitals. I will let you know. They should of course come over to go to fixed billets & not be stranded doing nothing in London.

All well. Revere hopes any day to get his transfer to the British army - possibly to the Royal Field Artillery. He feels rightly - that he should be in the fighting line. I must send you a copy of the letter he wrote to his chum Bobbie ^E~~Simmons~~ who began to dissect this term.

Pare's ¹⁵⁶¹Anatome Universelle came in the other day, 1961 - beautiful copy! It seems to be very rare. I suppose the barber surgeon students who knew no Latin ~~saw~~ thumbd out of use the first anatomy to be printed in France. Got it for a song from a non-medical Paris catalogue. Have shelved the side of the dining room & put there all the bibliographic vols.

Love to the darlings

Yours W. O.
