Dear Harvey

Still in bed, but better - no fever, cough less troublesome though I can raise the roof at times. An acute dry pleurisy started a week ago. T. 101° for a few hours, then fell. Pain very lively from 11²⁰ p.m. (the hour of wakening) to 6 p.m. next evening when a whirlwind paroxysm of coughing sent it to smithereens & it has never returned! I can feel - with hand - feel locally with in & expiration, & hear with rt. ear on the pillow the friction rub, appetite good & I am very comfortable - & bed is really a very good place. Did I tell you how much we enjoyed the Cambridge Hist. of Am. Literature .. It is good stuff. That & Emerson's History of the Club kept us busy in Jersey We miss Anna & Tony so much. You must spend a summer in England with the children before long. Perhaps you may come over to the Cambridge meeting. Allbutt is in fine form. Love to Kate & the darlings.

Yours ever,

W^m Osler.

He deserves them all

Osler W
