To Dr. Flick from Dr. B. G. Long.

Buffalo, N.Y.,
May 22, 1901.

Dear Doctor:

Your favor of the 15th instant to hand and contents noted. I presented the matter of a convention of delegates of the various societies in Buffalo this summer to our Board of Directors.

The question was carefully considered and the conclusion reached that it would be best to try and arrange a section on "Prevention of Tuberculosis" of the American Public Health Association which meets here in September 1901. We would have the advantage of being a part of a strong, well-organized body of men both professional and lay. What do you think of that idea?

Fraternally yours,

B. G. Long.

Lawrence F. Flick, M.D.
