

To Dr. Flick from Dr. Welch.

Baltimore,  
April 7, 1904.

Dear Dr. Flick:

I think that nothing would expedite the work of organization of the new Society for the Study of Tuberculosis more than the preparation by you and associates at the Phipps Institute of a draft of constitution and by-laws and such other statements as may be pertinent,; also a list of additional members to be invited to join, etc. Unless someone comes with definite proposals in these lines we shall accomplish little at the first meeting of our committee, and no one can do this so well as you or is more deeply interested in the success of the new organization which you have done so much to bring into being with such bright prospects of usefulness.

Will you attend to this? You know that the main work of committees usually falls on one man.

Yours sincerely,

William H. Welch.
