

LABORATORY OF ANATOMY

Oslerisms.

Half of us are blind, none of us feel and we are all deaf.

All things are possible in malaria: once malaria, always malaria.

In abdominal trouble if origin is unknown call it Tb.

Make the patient live within cardiac income in mitral insufficiency or aortic insufficiency-do not squander heart beats.

✓ Pneumonia is the old man's sweet release from this life.

The physician gets the credit for not curing thrombosis of the leg in typhoid fever whereas the trouble is with a faulty selection of grandparents.

Recurrences are continuous in malaria, very common in diphtheria, common in pneumonia, frequent in typhoid fever, and rare in measles.

Syphilis of the liver is the silver lining to the luetic cloud.

Suspicion centers around a rubicund face with roseate center and when accompanied with splotches of white hair: On the high road to Jerico!!

The death of a gentleman-with boots on.

Simple tic or habit spasm is a most common affection of children- and adults. ~~Head~~ Head nodding is different: occurs in very young and very old. Chorea is entirely different.

Jaundice is the disease that your friends diagnose.

Probability is the rule of life, especially under the skin- never make a positive diagnosis.

Syphilis and neurology are synonymous terms. Whenever in doubt consult Jonathon Hutchinson's Archives.

Raynaud's disease and chilblains are tweedle-dum and tweedle-dee.

Area of auscultatory romance-pulmonic area.

Patient with written list of symptoms: neurasthenia.

Punctuality is the only necessary virtue-all others will be added.

Yellow icterus, green icterus, black icterus.

Avoid all skins and bones, strings and stones.

Shut your mouth and save your life-Catlin.

In heavy workmen a trio of arterio-sclerosis, kidney trouble and hypertrophy of the heart is associated.

✓ Many drugs for a disease mean that all are inefficient.

Shortness of breath, cough, and swelling of feet: this tripod is pathognomonic of heart trouble.

Pain in relation to arterial disease-agonizing.

The man who dissolves gall stones is half brother to the one who aborts typhoid fever or pneumonia.

used The area of abdominal romance: where the head of the pancreas lies folded in the arms of the duodenum, and the arms of the celiac axis and superior mesenteric artery are wrapped around the neck of the pancreas.

For a yacht cruise: five gallons of medical comforts.

Failure to examine the throat of children is a glaring sin of omission.

In the examination of a case of giant colon: Where you expect to find water you find wind, no land anywhere (palpation).

✓ *used* The infernal daily newspaper and the worse than infernal monthly magazine have done more to create dissatisfaction than all other agencies. Believe nothing that you see in the newspapers and if you see anything in the papers that you know is true begin to doubt it at once.

Dermatographia is an outward and visible sign of an inward and *hidden* ~~nervous~~ instability.

LABORATORY OF ANATOMY

Practically is the only necessary virtue-all others will be added.

Yellow fever, green fever, black fever.

Avoid all skins and bones, strings and stones.

Shut your mouth and save your life-Catlin.

In heavy workmen a tale of arterio-sclerosis, kidney trouble and

hypertrophy of the heart is associated.

Many drugs for a disease mean that all are ineffectual.

Shortness of breath, cough, and swelling of feet: this triad is

pathognomonic of heart trouble.

Pain in relation to arterial disease-angina.

The man who dissolves gall stones is half brother to the one who

aborts typhoid fever or pneumonia.

The area of abdominal resonance: where the head of the pancreas lies

folded in the arms of the duodenum, and the arms of the celiac axis

and superior mesenteric artery are wrapped around the neck of

the pancreas.

For a quick answer: five gallons of medical comforts.

Failure to examine the throat of children is a glaring sin of

causation.

In the examination of a case of giant colon: there you expect to find

water you find wind, so fast appears (puffing).

The internal daily newspaper and the worse than internal monthly

magazine have done more to create dissatisfaction than all other

agencies. Believe nothing that you see in the newspapers and if you

see anything in the papers that you know is true begin to doubt

it at once.

Dermatoglyphics is an outward and visible sign of an inward sin

and a sure indication of

A diabetic, after a hunger day, followed by Van Noorden diet, with potatoes, shut down trust and stopped manufacturing sugar.

Heberden's nodes mean a few clinkers, a little too much stoking up.

We all have them south of the Mason and Dixon line.

Cauliflower endocarditis in acute articular rheumatism.

Overeating, venereal, and alcohol, these three, but the worst of these is overeating.

Why should cells of rete mucosa have pigment in certain groups?

Labor unions.

Arterio-sclerotic type in Corrigan ward over yonder (Ward M-colored male).

Story of a life: A man who could not stand a life of virtue acknowledged that his ancestry was of such a type as not to allow it. He broke down.

In any case:

1. Provide proper fuel. Food.
2. Keep furnace in trim. Stomach.
3. Provide for the clinkers. Refuse.

The small pox may be taken for the very little pox or the very big pox (chicken-pox and syphilis).

The duration of typhoid fever may be from 5 days to 5 months. Its onset is uncertain. The day of going to bed is fallacious as an indicator- perambulatory.

Note particularly this post-febrile frown-the toxins act on the frowning center.

The difference between the white and melanotic hues of skin is due to scouring. Internal secretions are more active in the white than in the black. The adrenal scours inside.

In carcinoma of the stomach empty the patient's swill barrel and clean it out-he often gains in weight afterward.

... it. He broke down.

In any case:

1. Provide proper fuel. Food.
2. Keep furnace in trim. Stomach.
3. Provide for the chimneys. Exhale.

The small box may be taken for the very little box or the very
big box (chicken-box and syphilis).
The question of typhoid fever may be from 5 days to months. The
onset is uncertain. The day of going to bed is fallacious as an

indicator - peremptory.

Note particularly this post-febrile flow - the toxins set on the
flowing center.
The difference between the white and melanotic mass of skin is due
to amount. Internal secretions are more active in the white than
in the black. The adrenal occurs inside.

In catarrhs of the stomach empty the patient's ...
... often it only ...

The wearisome monotonousness of heart cases is very impressive-
 always an apex systolic or presystolic or an aortic diastolic-
 a continuous murmur rejoices the ear.

In examining a patient three things are necessary;

1. Clear the deck-remove shirt.
2. Good light.
3. Good eyes.

Prematrimonials have all sorts of symptoms.

Diabetics are dietetic sinners-no constancy in them-they make bricks
 without straw-manufacture sugar without food.

Pneumonia and colitis are the most frequent terminal infections.

The disease that is diagnosed by the physician's secretary over
 the telephone: appendicitis.

Hippocratics.

Do no harm.

Experience is fallacious and judgment difficult.

Every man is a law unto himself.

Superfluity of lecturing causes ischial bursitis.

The above are a few of the trite sayings snatched by a busy hand
 from the lips of a busy man.

R. Bennett Bean

LABORATORY OF ANATOMY

In examining a patient three things are necessary;

1. Clear the back-remove shirt.

2. Good light.

3. Good eyes.

Fracturists have all sorts of symptoms.

Diabetics are diabetic sinners-no constancy in their habits.

Without steam-manufacture sugar without food.

Pneumonia and colitis are the most frequent terminal infections.

The disease that is diagnosed by the physician's secretary over

the telephone: appendicitis.

Hypochondria.

So no harm.

Experience is fallacious and judgment difficult.

Every man is a law unto himself.

Expertise at lecturing causes facial pustules.

The above are a few of the titles engraved on a busy hand.

from the lips of a busy man.
