

to Thayer Year?
C05417/34.2

Dear T.

I do not know
where the deuce the sheets can
be - stored away in some
fellows room. What a deuce of
a time we have had with
them. The question would be
most interesting. Perhaps the
new fellow in Path. can track
who is an a one - or could
take it up. One personal
impression wh. is not worth

much - is that Typhoid is not
a heart-damaging fever. How
few cases we have had with
serious heart lesions. Our aesthetic
deaths - which are often cardiac
in nature - are below in no.
1 to perforation or haemorrhage.

I do not know Sophista or
Sappho or Samela - but does
she really draw? If B. would
take her in hand it would be
all right. What about the appendix
girl? ask B.

Sorry to hear about Erlson
from you
