CUS417/34.46
(Dr. W. S. Thayer)

1898-9

Dear T.

I do not know where the deuce the sheets can be- stowed away in some fellows room. What a deuce of a time we have had with them. The question would be most interesting. Perhaps this New Fellow in Patt. Van ~~Wast~~ who is a one-er would take it up. One's personal impression wh. is not worth much- is that Typhoid is not a heart-damaging fever. How few cases we have had with serious heart lesions. Our Asthenia deaths- wh are often cardiac ~~of course~~ - are below in no. the perforation or haemorrhage. I do not know Sophrisba or Sappira or Samela- but does she really draw? If B. would take her in hand it would be all right. What about the appendix girl? Ask B.

Sorry to hear about Wilson

Yours

WO

Mrs. Max Prodel
