CUS417/5.17

FROM THE REGIUS PROFESSOR OF MEDICINE, OXFORD.

27, May, 1915.

Dear Fisher:

I have a duplicate of Dodonaeus Medicinalium observationum, with Benivenius' De abditis, etc., Hardevici, 1521. I daresay you have a copy of one of the other editions of Benivenius. If not, it is important as one of the first collections of post-mortems. Of course, Dodonaeus is always interesting.

Send a postal card to say whether you have it.

Sincerely yours,

W<sup>m</sup> Osler

Have you any early anaesthesia pamphlets (duplicates) of Morton, Jackson, or Wells?
