(J. H. Medical School - Williams)

From the Regius Professor of Medicine, Oxford

Dear Williams,

Thanks for your letter about Davison and Penfield. I have passed on the paper to the latter. Tell the Committee not to miss him, as he is a fine type. They are two of the very best men we have ever had here - such a credit to Princeton and to the country.

Have you or the Johns Hopkins Medical Library Reynald's Birth of Mankind? A very good 1545 edition, the second, has been offered to me. The early ones are excessively rare and sell from £ 15 to £ 25. If not in the library, it would be worth while to raise the money for it. I will subscribe \$10.

Sincerely yours,

Wm Osler
