DR. ELLIOTT C. CUTLER
LAKESIDE HOSPITAL
CLEVELAND, OHIO

August 19/
25

Dear Mr. Cushing:

In reading through the accumulated
journals I have across Dandy's article on
Subarachnoid Tumors - Posterior basal cerebral
Acoustic neuromas - So obviously
Religierant. I have to thank you
Each time such occasions come to
my attention that I learned from
your generosity & professional
Expression and a real scientific
attitude which is always humble

and generous in its search for truth.

At present am nearing the
close of Oslaw's Career and the war
period just before Reeves' death. It
is a most reading picture. You
will perhaps be interested to know
that I am presenting to the
Coding Scholars in the next graduating
class at Vermont a copy of
the "Life" in memory of Dr. F. T.
Ridder a graduate in '84 of
that school, a devoted friend
and guide, a man beloved

Towards his state and the present representative

of the country people here. Over his head

of the friends of the Phipps. I would do the

same as every school in the English speaking

world for a period of 10 years. If I

was in Boston I might persuade Howard

Nathaniel to do it for me in spite of

our own ancient and attempt to have him

compel the Democracy. I am glad my

last visit in Harvard toward all as well.

It has been a terrible peccatum. Mr. V.

I have no satisfaction in that I attach to
it in spite of the most beautiful features
the Dean ~~preaches~~ the idea I get
the point ~~of~~ ^{125,000} $\frac{x}{2}$. Never give up
the ship.

For 6 Boats, Henry, Barbara & B. y
