June 20, 1925

Dr. Harvey Cushing,
Peter Bent Brigham Hospital,
721 Huntington Avenue,
Boston 17, Mass.

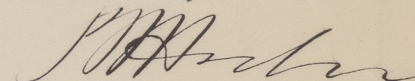

My dear Dr. Cushing:

Yours of the 11th arrived while I was out west. I am glad that you kept the Rummelin. You will be better pleased with it as times goes on.

I am glad that you got an earlier Durer. As we mentioned in Washington this Dutch edition is not by any means the best.

I had meant to write you on my return from the A.M.A. Convention in Atlantic City to tell you that never in more than twenty years attendance and exhibits, at these meetings, have I experienced so much interest and enthusiasm in any one thing as was shown down there in the "Life of Osler". I am sure that your appearance would have been greeted with an ovation. Personally, I found the work absolutely fascinating and I found that my judgment was verified by practically all of the leading members of the medical profession. How on earth did you find the time to do it?

Yours very truly,

PAUL B. HOEBER
