Dear Harry;

I have just got round
to your "Osler" and I am not going
to wait to finish it before writing
you how much I enjoy it. I met
the great man only once but feel
the same towards him that everyone
does who came in contact with him.
I have long maintained that a man
of high mental calibre will do wonderfully
well any thing he undertake whether it
be Brain surgery or biography or
going fishing. Please accept this
sincere tribute from one proud to sign
himself your old Friend
Edmund W. Clap
