Jan. 24, 1925

Dear Doctor Cushing:

I just finished reading this Osler book, and I write to congratulate you on the quality of it.

You have outBoswelled Boswell. You have given a picture of the man that is quite extraordinary. I know of no other biography so comprehensive. I have enjoyed it from cover to cover. My son Richard

Middleton who is a student in Harvard Medical College writes me that he got very much satisfaction out of it.

You probably have no recollection of me, but I have known you off and on since I spent a year at Hopkins 24 years ago.

Thanking you personally for the pleasure you have given me in this great book, and wishing you a happy new year I am

Sincerely yours

Geo. W. Middleton
