COS417/57-302

My dear Dr. Bushing-

Pressing the claim
of an old friend, at the risk
of being thought presumptuous
I am writing to tell you, of our
enjoyment with your delightful
"Life of Dr. Bushing".

We have been having happy
times, reading it in our
Waver (?) Tea & Topic Club!
Aside from the pleasure we
have derived from the subject
matter, we have all taken

Such pleasurable pride in this
work of one of our own Cleveland
boys, that we feel to congratulate
the public, and the literary world
in having the life of this won-
derful surgeon - and a life of
such glorious service for hu-
manity, made known in this
most charming way.

What a beauteous thing it is
that Nature invented, man-
ufactured and patented authors.
has been said of a former
writer! Dejoie that the good

work is still going on, and
that the name of Bushing is
invoked among them!

May all the treasures in
this delightful volume, so
laboriously collected and
classified, be consecrated
to the cause, in which you
good men are working - to the
furtherance of the well-being
of your fellow creatures,
is the wish of

Your old friend
