Dear Dr. Cushing

Very many thanks indeed for
your more than generous appreciation
of my review of the Life of Osler. The
book gave me an amount of
pleasure and afforded me a stimulus
in my ordinary work which I
should find difficult to express
without an appearance of affectation.
It is a very genuine pleasure to
me to find my halting Editorial
pleased for.

I send for the current number
of the Irish Journal for two
reasons: firstly, to draw your
attention to J. L. Laure's book, in
case you have not seen it, and
secondly, to enquire if Brookehead's
meningeioma (p. 135) comes under the
meteloblastomata of your Harrison
lectures, as published in the Lancet?
Yr. sincere Dr. Wm. Doohin
