June 10, 1926

Dr. Harvey Cushing,  
Peter Bent Brigham Hospital,  
Boston, Mass.

My dear Dr. Cushing:

In July 1925, at the meeting of the Medical Ass. of the Pacific Northwest in Portland, Oregon, our mutual friend, Dr. Lewellys F. Barker, made a neat little speech on "Dr. Cushing as an Author", referring in a very complimentary way to your LIFE of the great teacher, Sir Wm. Osler.

On arriving home from Portland, I bought what I thought to be a first copy of your book to arrive in Utah and at once went for a vacation with Mrs. Allen to Bear Lake, Idaho where we read with delighted interest and profit your splendid work.

I feel that you have conferred a boon on the medical profession of the world in particular and on humanity in general by your painstaking and accurate labor, in doing what I feel sure to you, was a labor of love.

I feel myself most fortunate to have been one of Dr. Osler's students at Hopkins during the winters of 1901-1902. I also wish to tell you that the course in Operative and Dog Surgery which Dr. Middleton and I took under you, has been of untold benefit to me since that time.

I do not know of any book outside of the Word of God itself which I prize so highly as your "Life" of our great friend and teacher, Dr. William Osler.

Very sincerely yours,

*Samuel H. Allen,*
