Saturday Night.

Dear Dr. Cushing:

What a blessing to you as you begin to face old age that you have written such a book as "The life of Sir William Osler!" For generations young medical men will be grateful to you for having brought into two volumes so beautifully the life of the great medical humanitarian.

"Aequanimitas" has been helpful to me many times. It and my set of "The life" are inscribed to my ten-months-old son who, I hope, will be a physician after I am gone.

The spiritual blessing to you in creating such a work will grow with the years. This note is sent on impulse, as were many of his. Do not bother to acknowledge it, but I want to thank you for your masterpiece.

Very sincerely yours,

Shant Grasso
