Dear Cushing:

Thank you for your trouble in the matter of Larsen's letter. I appreciate all the difficulties you mention; and I had already consulted Sarton, without any result. It may be that something could be done at the American-Scandinavian Foundation, which I will try. I had already suggested Islandica as a possibility. If nothing happens before Streeter comes back, I may tackle him.

Now that you have got out your magnum opus in the field of medical biography, you must expect us to turn to you for advice! Hearty congratulations upon it.

Cordially yours,

*C. Haskins*

Dr. Harvey Cushing.
