

Wharfe element

~~1028/59/25~~

Atlantic Bronze Age

D Shenan Celt

Penetration of Iberian element in England

Don't stop here for ex.

Cornwall skin does not hold,

(Peninsular like a
ferruginous iron - or
sheet of ironing to
England)

(Orkney legastoroid intruder in Cornwall is Celts and remains of Morse blues over found Celts)

1) Earl inhabitants some dark race 'stone' people the Iberian cells - neolithic

2) The Celts Caesar incenture were big red haired men - 'Sandy the Deak' come
from Spain. Some call them the 'better Britons. around and 300 BC.

No little people pressed westward when Caesar arrived they

barbaric people westward

3) The Anglo Saxons (Angles) in about 400 AD. Anglo Saxons in mass

4) Scandinavians

Smaller dark people more intelligent. The same dark race come westward
around the Mediterranean - Italian Spaniards -

(cf. Prof. Boyd Dawkins book)

(same the Normans)

Shenon - (Britons are different) Orkney to
do the Phoenicians -

cf Repley Races Europe.

CUSH/17/59.25

Spore cells in Cornwell during whole development period.

Bacter cells - dead cells --

rudimentary a Phormicium intermedium -

^{dark}
Cornish crosses all ± some Bullen's ± same.

13, NORHAM GARDENS,
OXFORD.

Phoenicea or Phamisi.

St. Cray Wood's letter.

An extraordinary Euteria among the other descendants - Tall, fair blue eyed
 as heavy like Featherstone and a dark, small, quack moving type like
 his wife. I had always supposed this was a Pictor strain
 until I remember some members of the Australian branch of the
 family ^{sayle descended from the Watson-Cole branch} whose common ancestor was a great great grandfather
 is great grandfather to Featherstone's father and the Euteria to
 W.O. was extraordinary ^{particular in the shape of head & forehead!} It says may be so dark they resemble
 walrus - they lose their hair earlier in life much as W.O. did but
 whose remains rarely grow for late late in life.

Mrs. L. tells me in Cornwall he saw a great number of very dark people
 under good many of his names. Probably some Mediterranean rather
 than Breton.
