

1028/69/17

COS417/69.17 1873

In January he began following clinical work on Jan 13 an autopsy by Sir Wm Jenner
was case of Phthisis and later in clinics also.

Dr Purjes Do Boston nervous diseases.

Wilson Fox case of epilepsy with Post mortem

He appears to have taken Jenner's lesson also et. b's glands many in teachers hand.
His symptoms have been in Berlin.

He also took a course of lectures on Embryology by C. Klein at the ^{Jardens} ~~Brenn~~ Institution
beginning July 8 to July 26th and must have been interested for "James Barle" as appears
once with Fox of the ~~best~~ note book

He seems to have studied some experimental work a James's blood which does not
seem to have come to mind.

Berlin notes scanty: evidence trouble in German. Nov. 19 73 Autopsy Colored of stomach
28 Abscess of Brain
Dec. 4 Echinococcus of liver
5 Congenital syphilis
10 Mephitic persons
Sulphureous "

(His disease H. H. & Meuman
Jan 14th 74 re. Vienna)

(No note book of the Berlin period)
