CONSULTATION BY APPOINTMENT
3 TO 5 P.M.

DR. NORMAN B. GWYN
48 BLOOR ST. EAST
TORONTO

May 21st. 1920.

Dear Harvey

In answer to the enclosed one can say absolutely that Uncle was not with any doctor or taking any practise in Dundas that summer. He worked as a student in the office of Dr .Holford Walker, but the Doctor is very positive about that being the only capacity in which he and Uncle were ever associated. O'rilly the superintendent of the Hamilton hospital died a few weeks ago, he had been in seclusion for ~~we-~~ weeks, he had often talked most patronizingly of uncle to me and uncle had been in the old hospital as a worker in some capacity, a line to Mrs. O'Reilly at 229 St. Clair Ave. ^w Toronto, might get some information. I might add on the Q.T. that family gossip has always said that " had Willie been financially settled in his younger days he would have married Sophie Rolph O'Reilly". Knowing him as we do I fancy they just did not understand his affectionate little ways.

Dr. J.H. Mullin 201 James St. S. and Ingersoll Olmstead 213 James St S. Hamilton, might be able to tell you about Hamilton hospital associations.

records you will find a gold mine, autopsies written in his own hand, his own comments such as "the first case in which Pepper injected Iodine into the pleura" the big volumes are all preserved and as I was looking at them a few days ago the superintendent will remember about them. The three microscopes with which uncle did his early work are in this city would you like a group of them photographed?
