

Some of Panson's ~~larger~~ first papers published in Canada were on the subject of
helminthology, and this he attributes to having conversed w. W.O. about it.
W.R.G. 1st paper in Journal of Morphology contains an article by

Panson's paper on AB MacCallum

Sphyranura Astleri

(a trematode worm found
on gills of a murex)

A species from W.O., called W.R.G.'s attention very
early, pointing on the drive with him Oct '75 to Weston.

P.W. had written on

Canadian Helminthology and W.O. called his attention to
this group.

Johnston spoke of this also to P.W.

W.O. had found it
and had not named
it.

~~John Johnston~~
~~Sphyranura~~
of Johnston '66

CUS417/70.19

In the career of the Univ of Toronto there were many
microscopical sections made w.o. funds
under direction of
Remy, Mayo - probably under Prof. Hincks

W.S. more interested in helminthology (cf Ballou's
lectures etc)

Further to Naturalist-Studies 3

Circu Oct 12th 1874

Charac. glw. to call on Ramsay Wright who had just come out to
take chair in Biology (?) from Edinburgh. We was stoping with
Edmund - came in E's canoe and took Wright and to see
Johnson.
