Medical General Hospital Pathological Report Vol I In the year
ending May 1st 1877 Makins Dawson Pr. 1878 pb 97

The preface to the Path Report signed this date Jan 13th St Catherine St.

Records of exactly one hundred autopsies have been entered in the post-mortem book
of the General Hospital for the year ending May 1 1877. A few of special interest in
private practice have been included.

The post mortems are performed under my supervision by the students attending
the Hospital and the system of inspection followed is that of Virchow, at the Charité,
Berlin, fully given in his "Leçons-Techniques". The rules are taken in the spirit
from declaration

He does not add that they were subsequently written out at length in his own fine
hand and comprise a third quarto volume

The volume is dedicated

To my teacher

James Bonvie M.D.

Emeritus Professor of Pathology in the University of Medical School Toronto

This first pathological report from a

Caroline Hospital

is gratefully and affectionately dedicated

On the title page he quotes Veris

"Pathology is the basis of all true instruction in practical medicine"

Veris was true unless any other day, and always with better and it is the
further long to forget it etc.

It is a volume of 97 printed pages. dated 1878 ^{or} printed

Begins with Case LXXI & contains judgments which had
been given in the journals.

The succeeding volume II was pub. 1880
