

~~1028/79/17~~

Nov. 13 1883

CUS 417/79.18

Note books during all this early period full of drawings of histological preparations -
must have given him his power of observation and certainly what he is
his important observations on infections endocarditis for the first time drawings
of what he calls verrucous endocarditis. 13 Nov. 1883 for ex. Many of the drawings
cut out for publication. Page 7 over fine pencil writing in pencil of his observations
difficult to read & a magnifying glass.

Et. Coler note ^{re} ~~re~~ Reidy to admission for such drawings.
