

(Russell H. Chittenden)

1, West Franklin Street

Baltimore, Md. Nov. 26th, 1904

CUS417/101.103

Dear Chittenden:-

4 July 9 1904

I am sure you are the person to write the introductory section, and it could be entirely from your own standpoint, and purely physiological. After all, the pathological portions of the subject will be dealt with elsewhere. I am particularly anxious that this whole question of nutrition should be placed clearly before the profession. Undoubtedly you are the man to do it.

With kind regards,

Sincerely yours,

W^m Osler
