Just
Dear Pratt:-

Thanks for your note, and for the references. I have been reading an excellent article by Chiari and Benda in the last volume of the German Pathological Society's Transaction. In the same volume there is an interesting, short discussion on the blood plates. So glad you are continuing your work on the subject. I will arrange a symposium on the blood for the third Monday of February. You will, of course, come to us. Do get some of the young fellows to keep their eyes open for cases of syphilitic aortitis, such as Chiari describes.

Sincerely yours,

W Osler.
