Dear Dr. Abbott:-

Thanks for the notes and the photos - please let me have a memo of the cost of the latter. The more I think of a nice fasciculus on the heart and vessels - as an introductory portion of the general catalogue - the better I am pleased. Would you look under aorta - rupture of - in the Index Catalogue second series, and see if there is any good - or likely paper - if in the library and not too bulky please send it. See if the last edition of Zregler has any reference.
