1, West Franklin Street.

Baltimore, Md. Dec. 3rd, 1904.

Dear Pratt:-

I think the latter title you mention would be preferable. I have asked Kemp to take the histological side. Have you read the papers of Benda and Chiari in the last volume of the transactions of the German Pathological Society on syphilis and aneurism? I am sure they are on the right track.

Sincerely yours,

W. Osler.
