CUS417/101.47

Dear Dr. Libman:

Thanks for your notes, which are exceedingly interesting. Do let me see you when you come down, and if you have the specimens, I should like very much to go over them with you. I am interested in the subject of mycotic aneurisms, particularly of the larger vessels.

I should like it very much if you would come in to lunch or dinner, preferably the latter.

Sincerely yours,
