Dear Chittenden:-

cf. July 9 1904

I think it would be nice to treat the subject under the following heading:-

- (1). General discussion of nutrition in the normal state. (2). Diet and health.
- (3). Under and over nutrition. (4). Modifications of nutrition in disease.

The second edition of the French *Traité* edited by Bouchard gives a very good summary.

With kind regards,

Sincerely yours,

W^m Osler
