

Should be to G.R.O. that he was not just to ^{reconcile} ~~reconcile~~ - the mode his ~~disposition~~,
 disposition,

W.O. was not one to cultivate what Matthew Arnold called the
 the "almost blood-thirsty" change to life" which is not
 only not coming, but ridiculous.

Madame occurs in a review on the Story of Death in the Spectator May 7 1910
 W.O. looking by the attitude is less approval to Doubt certainly than withdrawn
 the story that of death really have one.

To get things done one must be content not to get the credit for them !!

I believe Mary Shelley once he would have done
 die of pneumonia.

This was W.O. though not a
 except he would have put down
 about himself
