

(letter, script)

Monday 9 pm

[1st Dec '19]

Sir Wilhelm went to sleep after he was washed and slept 2 hours - His Temp was 101.4 when he woke pulse 112 - respiration 30 at 5 - 100.8 pulse 83 resp. 28; at 7 $\frac{1}{2}$ 101 - pulse 88 - resp 30 - He is asleep now and has slept about 6 hours in all. His cough has changed entirely. Is one big cough - no hacking cough. I'll call you up abt 9 o'clock tomorrow. Dr. Gibson finds nothing more in lung - & I think it is the the influenza cutting up this time - He has taken food all right - milk & soup -
