

G. R. O. to Amilloch

CUS417/130.58

(letter, script)

Wednesday Eve.

[5th Nov '19]

----- Last Eve. Sir Wilhelm's Temp went up to 100.2 — he had coughed all day — he had  $\frac{1}{4}$  morphine & slept all night. Dr. Gibson could find nothing this morning but he is spitting up much more — It is 99.2 now, 9 pm. but he looks well & is eating splendidly — sat up from 2.40 to 7 — & did not seem tired, I am very uneasy & can see no relief from this cough. ----- The weather is bad for him of course — but the room is warm — I will try to be patient.
