

Oxford,

CUS417/130.79

November 20, 1919.

You will be - or rather, knowing the beastie, you will not be surprised that G. found to-day Herr Prof. V. Pfeiffer - his bacillus in my sputum. At 3 a.m. I coughed up a solid block of them in a paroxysm - not a bad one. Very good day and a bout some time in the a.m. Every prospect pleases! I hope you are coming on Saturday - if only to see the bacilli. The sputa have a vivid look. Love to Wood.

W.O.
