Dear Ogden

Glad to have your note this week. Will send report of lectures ~~re~~ which were not very satisfactory to me but they passed off fairly well. I went to Montreal on 26th ult. to see Percy Bath married to his old love Ruth Whitney. They have gone to England for three months. Mrs. F. has moved to the Island for the summer. All are well. Do you remember a young Dr. Lafferty from Pembroke, who was under Buller's care - optic neuritis &c. ~~I thought it cereb. syph.~~ He died on Sunday when I was in Montreal, & we (F. S. & L) went to Perth and took out the brain. Sehr interessant. An old glioma at base of 3rd vent. involving infundibulum & tuber cinereum, with cholesteatomatous formation probably from endothelium of infundibulum.

Am beginning to get practice. Shall go to Toronto on July 20th, remain until Sept. 1st. No chance for the West this year.

Yours sincerely,

W Osler.
