

He was in Toronto, apparently ^{giving} expert testimony in a medico-legal case, for a few days, and before leaving sends a card to J.H. Mussen.

(Dr. John H. Mussen - Philadelphia)

1028/83/22

[June 25, 1887]

To June

I don't see John Mussen & will this Chas. Hays

Friday eve.

Dear M:

I thought to have seen you at the Society last night. I wished to talk about the Dispensary. Pepper suggests that if you wish to go out - no chief should be appointed but Dock should share your room, alternating with Hughes. What are your wishes? I leave tomorrow for Toronto & shall be away until Wednesday am.

Yours sincerely

W.O.

And on the 28th Dr. Mussen wrote Mrs. Gump: "Welles' melan-oma re."

~~Welles' melan-oma re.~~

9 next letter

CUSH17/83.22

It was the reception of a visit on the Sheford and the Howards at Tacoma (?) the July and August. The summer ~~was~~ ^{was} passed largely in Toronto ~~where~~ ^{where} he was at work ~~at~~ ^{getting} his Chorea lectures ready for publication. One of these was given before the Association meeting in Hamilton where (Sept 20th) were many of his old friends, Macdonnell, Stewart, Buller Miles and Gardner of Montreal, and James Mallock and Muller of Hamilton were encountered. ~~Just before the following letter~~ ^{just before} ~~from~~ ^{from} the following letter he received some news from there to Washington for the International Medicine Congress which ^{was} opened September 15th by President Cleveland. He said to be one of ^{my} few of the original committee, ~~who had withdrawn~~ ^{who} could only think clear to attend. ^{that had been superseded} as he intimates there were few foreign guests and this without special distinction. The reception at the White House ~~was~~ ^{was} given by President and Mrs. Cleveland was a "crush" and almost the only redeeming feature of the week was the uniform good weather. It is well to draw a curtain over the 12th International Medicine Congress.

^{my}
Dear M
