Baltimore, Feb. 10th, '94.

*Wm Osler*

Dear Laflaur:-

The highly-scented second volume of the American Text-book of Medicine is here, and I will take the first opportunity of sending it. You might let me know if you hear of a chance.

Things go on much the same here. In a few days you will have our Typhoid-Fever Report, in which you will recognize a number of old friends. Hewetson and Thayer are working hard at the malaria material.

I send you three tuberculosis pamphlets. In that Toxaemia case there was a serious error of omission, as there was no tuberculosis of the cerebro-spinal system.

Mrs. Osler sends kind regards.

Sincerely Yours,

W<sup>m</sup> Osler

*M. J. J. J.*

*Refers 2nd vol. which contained Osler articles on*

- ① Diseases of the suppurative capsule and serous fluids a very small sized tract it is today and of included typhoid typhoid typhoid.
- ② Diseases of the blood.  
*Excellent but includes Hodgkin's disease. 50 days.*

*of note in this at 3000 previous chapters*

*Look up and see in and more than is not an over review of this subject.*
