NOTES FROM BOOKS July 2nd 1887

On Chorea Osler.

From Geo. Huntington.

La Grangeville N.Y.
July 2nd. 1887.

My Dear Doctor,

Your letter making inquiry concerning Hereditary Chorea is at hand, and in reply I would state that I have no facts in addition to that published in the Med. and Surgical Reporter to which you make reference.

Since my graduation I have had no opportunity to study the class of cases referred to, much to my regret, and can only refer you to my friend Dr. Edw. Osborn of East Hampton, Long Island, N.Y. who may have acquired facts in addition to those mentioned in my article. There are at present several typical and well marked cases, at and near East Hampton, and if you had opportunity to devote a little personal study to them I think you would feel yourself repaid, and perhaps add something of interest to science.

I shall be particularly interested in perusing your forth coming article in Hays Journal.

With much respect,

Yours truly,

Geo. Huntington.

Dr. Wm. Osler.
