Queen's College, *Wotton*  
Oxford.

29 April, 1895.

My dear Dr. Sanderson,

2 The Hebdomadal Council will probably want to learn how the Lichfield matter is going on. Unless a ~~Statute~~ is soon promulgated it will not get through this term and failing this the activity of the Lichfield fund will be suspended. Perhaps this may be best thing but it will probably be canvassed and should there fore be definitely adopted on a policy and not the result of drift. Should you like to have a meeting of the Medical Committee of Council to consider the position. If so please give the times that are "impossible" for you. My hours for this week and next week are getting very much occupied.

---

✓ The Vice Chancellor has of late had the pleasure of entertaining the examiners for the 2d. M.B. ~~examination~~ at dinner during their stay in Oxford. Would you let me know at your earliest convenience on what day you would be likely to have the greatest number of them in Oxford at the same time?

Yours very truly,

J. R. Magrath.

The Regius Professor of Medicine.
