

CUS417/91.19

W.O., to J. George Adami.  
April 24th 1895.

1 West Franklin Street.

Dear Adami: In the second of those heart cases with presystolic murmur,\* did adherent pericardium exist? The question is one in which I am a good deal interested. We have had several very striking cases of late.

I hope you are coming down for the meeting in May.

Sincerely yours,  
Wm. Osler.

How is L.M.C.? and the baby?

J.G.A. \* I must have published some cases before the Montreal Med. Chi. Soc. Unfortunately we have here no set of Montreal Medical Journals to refer to.
