Sunday. [no date]

Thelma Osler 1895

Dear Thayer

~~Handwritten~~

[The second edition of the Juncos Book]

Juncos
Canton

Do what you like about Camac. The question is tho. whether Lager would have enough to do with the Bacteriology alone - It would do him good to have the ward at the same time, say & without any Dispensary work. I finished the proofs yesterday. There has been a delay with the new cuts, but I hope to have the index in hand by the 18th and should have the work ready for distribution by Sept. 15th. We leave for Toronto next Sunday, address 83 Wellesley St. We go to Canton Mass. to Mrs. Reveres on Wednesday eve. This is a delightful place. so quiet & secluded & the leaders off the rocks into deep water have renewed my youth. Mrs. Osler keeps very well. I hope you are arranging to leave on a fast SS, Sept. 11th. You could have 2 weeks in England & a few days in Cambridge on your return & be back in the hospital by the 12th of October a extra week would do you no harm. I am glad that they are pushing on with the alterations. It will be a great comfort to have Fuicher in charge & doing special work. I have almost finished the Typhoid histories of the past two years. There will be nearly enough for a serviceable fasciculus with the paper on Neuritis, which I read last winter Blumers paper on Pyuria & if I can get Halsted to put Parsons paper in also.

Love to all the boys,

Yours.
