Dear Warren:-

F. J. Shepherd, James Bell, and George Armstrong of Montreal are good progressive surgeons. You would not get anything out of Roddick, as he has almost retired from surgical work, but the three men I mention are active and good. In Toronto I. H. Cameron, the professor of surgery in Toronto University is a very capable fellow, and might be induced, though he is not a prolific writer. Peters is a fellow coming very much to the front in Toronto, and he might give you something.

I am glad to hear of your scheme. Of course I will say nothing about it.

Sincerely yours,

Wm. Osler.
