Love to ~~Barker~~. It must have been a very curious attack. The photos were shocking- too bad to take.

Writing Angina lectures  
et. callio 6  
00019

Dear Thayer

We got here on Friday- after a very comfortable journey. I hope you have got on with the lectures. Miss H. told me that she wanted to get off for the last week of this month & return for the 1st week of Aug. I told her to arrange it with you. Give her all the dictation you can as she can finish any after her return Sept. 1st. I went to town <sup>on Monday</sup> & saw several old friends at the library & the Tavern Club- Prince, Bowditch, Bullard & Reynolds. I have almost finished the angina lectures- which have extended into seven I suppose they will be appearing soon in the N.Y. Med Journal. This is a fine spot, plenty of fresh air & the bathing is splendid. The past few days have been rather sweltering. Mr Egerton is flourishing 21 lbs. Mrs. Osler is very well. I hope Barker can get off soon. He did not seem to me very well. Love t all the boys. Keep an eye on Norman & on his reading. He should get off sometime in Sept. for a few weeks. He evidently had a hard winter.

Yours .

Wm Osler

W. Osler
